

Mast Multialternative Strategy Fund

Class A Shares (CSQAX)

Class I Shares (CSQIX)

A series of Investment Managers Series Trust III (the “Trust”)

Supplement dated August 20, 2026, to the currently effective Prospectus dated February 28, 2026, as supplemented.

Effective August 21, 2026 (the “Effective Date”), Manteio Scalable Technologies LLC (the “Advisor”) has agreed to lower its management fee for the Mast Multialternative Strategy Fund (the “Fund”) from 1.04% to 0.90% of the Fund’s average daily net assets. Accordingly, as of the Effective Date, the following revisions are made to the Prospectus:

Each of the “Fees and Expenses of the Fund” and “Example” sections beginning on page 11 of the Prospectus is deleted in its entirety and replaced with the following:

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in Class A Shares of the Fund. More information about these fees and other discounts is available from your financial professional and in the section titled “Purchase of Shares” on page 39 of the Prospectus and under “Waivers and Discounts Available from Intermediaries and Conversion Policies” on page 58 the Prospectus.

Shareholder Fees (fees paid directly from your investment)	Class A	Class I
Maximum Sales Charge (Load) Imposed on purchases (as a percentage of offering price)	5.25%	None
Maximum Deferred Sales Charge (Load) (as a percentage of purchase price)	None ²	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)		
Management Fees ¹	0.90%	0.90%
Distribution and/or Service (12b-1) Fees	0.25%	None
Other Expenses ³	0.25%	0.25%
Total Annual Fund Operating Expenses	1.40%	1.15%
Fees Waived and/or Expenses Reimbursed ⁴	(0.30)%	(0.30)%
Total Annual Fund Operating Expenses After Waiving Fees and/or Reimbursing Expenses^{3,4}	1.10%	0.85%

¹ The expense information in the table has been restated to reflect the current management fees, effective August 21, 2026.

² Purchases of Class A shares of \$1 million or more may be subject to a 1.00% deferred sales charge on redemptions within 12 months of purchase.

³ The Fund invests in a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands. “Other expenses” include expenses of both the Fund and the wholly-owned subsidiary.

⁴ The Fund’s advisor has contractually agreed to waive its fees and/or pay for operating expenses of the Fund to ensure that total annual fund operating expenses (excluding any taxes, leverage interest, brokerage commissions, dividend and interest

expenses on short sales, acquired fund fees and expenses (as determined in accordance with SEC Form N-1A), professional fees related to services for the collection of foreign tax reclaims, expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation expenses) do not exceed 1.10% and 0.85% of the average daily net assets of Class A shares and Class I shares, respectively, of the Fund. This agreement is in effect through February 28, 2027, and it may be terminated before that date only by the Trust's Board of Trustees. The Fund's advisor is permitted to seek reimbursement from the Fund, subject to certain limitations, of fees waived or payments made by the advisor to the Fund for a period ending three years after the date of the waiver or payment. Such reimbursement may be requested from the Fund if the reimbursement will not cause the Fund's annual expense ratio to exceed the lesser of (a) the expense limitation in effect at the time such fees were waived or payments made, or (b) the expense limitation in effect at the time of the reimbursement. Reimbursements of fees waived or payments made will be made on a "first in, first out" basis so that the oldest fees waived or payments are satisfied first.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The example reflects the Fund's contractual fee waiver and/or expense reimbursement only for the term of the contractual fee waiver and/or expense reimbursement.

Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	One Year	Three Years	Five Years	Ten Years
Class A Shares	\$631	\$917	\$1,224	\$2,092
Class I Shares	\$87	\$336	\$604	\$1,371

The table in the second paragraph under the "Investment Advisor" heading on page 36 of the Prospectus is deleted in its entirety and replaced with the following:

Fund	Contractual Advisory Fees As a Percentage of Average Daily Net Assets
Mast Managed Futures Strategy Fund	1.04%
Mast Multialternative Strategy Fund	0.90% ¹

¹ Prior to August 21, 2026, the Mast Multialternative Strategy Fund paid the Advisor an annual advisory fee of 1.04% of the Fund's average daily net assets.

All additional references in the Prospectus to the annual management fee with respect to the Fund are revised as indicated above.

Please file this Supplement with your records.

Mast Managed Futures Strategy Fund

Class A Shares (CSAAX)

Class C Shares (CSACX)

Class I Shares (CSAIX)

A series of the Investment Managers Series Trust III (the “Trust”)

**Supplement dated August 7, 2026, to the currently effective
Prospectus, Statement of Additional Information (“SAI”), and
Summary Prospectus.**

Please see below important information regarding the upcoming reorganization of the Mast Managed Futures Strategy Fund into the Mast HedgeIndex Managed Futures Strategy ETF.

The Board of Trustees of the Trust and shareholders of the Mast Managed Futures Strategy Fund (the “Fund”) have approved the reorganization (the “Reorganization”) of the Fund into the Mast HedgeIndex Managed Futures Strategy ETF (the “ETF”), a newly created series of the Trust. In the Reorganization, each shareholder of the Fund will receive shares of the ETF and/or cash equal to the value of the shares of the Fund owned by the shareholder. The Reorganization is expected to occur after the close of business on August 31, 2026. In anticipation of the upcoming Reorganization, the Fund’s Class A Shares and Class C Shares will be converted into Class I Shares on August 14, 2026, and the Fund will close to all purchases on August 27, 2026.

The ETF will have the same investment objective and substantially similar investment strategies as the Fund. Following the Reorganization, Manteio Scalable Technologies LLC, the Fund’s investment advisor, will serve as the investment advisor to the ETF and Tidal Investments, LLC (“Tidal”) will serve as investment sub-advisor to the ETF. Tidal does not currently serve as investment sub-advisor to the Fund. Additional information about Tidal will be provided to shareholders in an information statement prior to the Reorganization.

Please file this Supplement with your records.

Mast Managed Futures Strategy Fund

Class A Shares (CSAAX)

Class C Shares (CSACX)

Class I Shares (CSAIX)

A series of Investment Managers Series Trust III (the “Trust”)

(This Supplement replaces the Supplement dated February 27, 2026.)

Supplement dated March 2, 2026, to the currently effective Prospectus, Summary Prospectus, and Statement of Additional Information (“SAI”).

Based on the recommendation of the Fund’s advisor, Manteio Scalable Technologies LLC (the “Advisor”), the Board of Trustees of the Trust has approved the reorganization of the Mast Managed Futures Strategy Fund (the “Fund”) into an exchange-traded fund (the “Reorganization”). The Reorganization of the Fund is subject to approval by its shareholders and will occur pursuant to an Agreement and Plan of Reorganization whereby the Fund will transfer all of its assets and liabilities to the Mast HedgeIndex Managed Futures Strategy ETF (the “ETF”), a newly created series of the Trust. If approved, each shareholder of the Fund will receive shares of the ETF and/or cash equal to the value of the shares of the Fund owned by the shareholder. In addition, if the Reorganization is approved, it is expected that the Fund’s Class A Shares and Class C Shares will be converted into Class I Shares prior to the Reorganization. No sales charges or redemption fees will be imposed in connection with this share class conversion.

There will be no change in the Fund’s investment objective or portfolio management in connection with the Reorganization, and the ETF will have substantially similar investment strategies as the Fund. Following the Reorganization, the Advisor will serve as the investment advisor to the ETF. The Reorganization is not generally expected to result in the recognition of gain or loss by the Fund or its shareholders for U.S. federal income tax purposes (except with respect to cash received by shareholders in lieu of fractional shares, if any, or with respect to redemptions of shares held through an account that is not permitted to hold the ETF shares as discussed below). The costs of the Reorganization will be borne by the Advisor.

The Fund operates as a mutual fund and the ETF operates as an actively managed exchange-traded fund. Exchange-traded funds may provide benefits to shareholders compared to mutual funds, including additional trading flexibility and increased transparency. The ETF will operate under a unitary fee structure, where it will pay the Advisor a fee and the Advisor will pay all of the ETF’s expenses except for the advisory fee and certain other expenses. The ETF will have a lower management fee and is expected to have lower total annual fund operating expenses than the Fund (before and after waivers). Additional information regarding the differences between mutual funds and exchange-traded funds and potential impact to shareholders will be included in the proxy statement noted below. In order to receive shares of the ETF as part of the Reorganization, Fund shareholders must hold their Fund shares through a brokerage account eligible to hold and trade shares of an exchange-traded fund. Shareholders holding their Fund shares through accounts that are not eligible to hold shares of an exchange-traded fund will not participate in the Reorganization and will instead receive a cash distribution equal to the net asset value of their Fund shares in full redemption of their Fund shares. If you are unsure about the ability of your account to accept shares of the ETF, please call 1-833-829-0010 or contact your financial advisor or other financial intermediary. In addition, the ETF will not issue fractional shares and, as a result, shareholders participating in the Reorganization may receive cash in lieu of fractional shares of the ETF. Cash distributions in lieu of fractional shares or with respect to redemptions of shares held through an account that is not permitted to hold ETF shares may result in the recognition of gain or loss for federal tax purposes.

The Trust will call a shareholder meeting at which shareholders of the Fund will be asked to consider and vote on the Reorganization. If the required shareholder approval for the Reorganization of the Fund is obtained, the Reorganization is currently expected to take effect in the second quarter of 2026.

Shareholders of the Fund will receive a proxy statement with additional information about the shareholder meeting, the proposed Reorganization, and the ETF. Please read the proxy materials carefully, as they will contain a more detailed description of the proposed Reorganization.

Please file this Supplement with your records.

The date of this Prospectus is February 28, 2026

SUMMARY SECTION – MAST MANAGED FUTURES STRATEGY FUND

Investment Objective

The Mast Managed Futures Strategy Fund (the “Fund”) seeks to achieve positive absolute returns that have a low correlation to the returns of broad stock and bond markets.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in Class A Shares of the Fund. More information about these fees and other discounts is available from your financial professional and in the section titled “Purchase of Shares” on page 39 of the Prospectus and under “Waivers and Discounts Available from Intermediaries and Conversion Policies” on page 58 the Prospectus.

Shareholder Fees (fees paid directly from your investment)	Class A	Class C	Class I
Maximum Sales Charge (Load) Imposed on purchases (as a percentage of offering price)	5.25%	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of purchase price)	None ¹	1.00% ²	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)			
Management Fees	1.04%	1.04%	1.04%
Distribution and/or Service (12b-1) Fees	0.25%	1.00%	None
Other Expenses ³	0.54%	0.54%	0.54%
Total Annual Fund Operating Expenses	1.83%	2.58%	1.58%
Fees Waived and/or Expenses Reimbursed ⁴	(0.28)%	(0.28)%	(0.28)%
Total Annual Fund Operating Expenses After Waiving Fees and/or Reimbursing Expenses^{3,4}	1.55%	2.30%	1.30%

¹ Purchases of Class A shares of \$1 million or more may be subject to a 1.00% deferred sales charge on redemptions within 12 months of purchase.

² Purchases of Class C shares are subject to a 1.00% deferred sales charge on redemptions within 12 months of purchase.

³ The Fund invests in a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands. “Other Expenses” include expenses of both the Fund and the wholly-owned subsidiary.

⁴ The Fund’s advisor has contractually agreed to waive its fees and/or pay for operating expenses of the Fund to ensure that total annual fund operating expenses (excluding any taxes, leverage interest, brokerage commissions, dividend and interest expenses on short sales, acquired fund fees and expenses (as determined in accordance with SEC Form N-1A), professional fees related to services for the collection of foreign tax reclaims, expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation expenses) do not exceed 1.55%, 2.30%, and 1.30% of the average daily net assets of Class A shares, Class C shares and Class I shares, respectively, of the Fund. This agreement is in effect through February 28, 2027, and it may be terminated before that date only by the Trust’s Board of Trustees. The Fund’s advisor is permitted to seek reimbursement from the Fund, subject to certain limitations, of fees waived or payments made by the advisor to the Fund for a period ending three years after the date of the waiver or payment. Such reimbursement may be requested from the Fund if the reimbursement will not cause the Fund’s annual expense ratio to exceed the lesser of (a) the expense limitation in effect at the time such fees were waived or payments made, or (b) the expense limitation in effect at the time of the reimbursement. Reimbursements of fees waived or payments made will be made on a “first in, first out” basis so that the oldest fees waived or payments are satisfied first.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The example reflects the Fund's contractual fee waiver and/or expense reimbursement only for the term of the contractual fee waiver and/or expense reimbursement.

Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	One Year	Three Years	Five Years	Ten Years
Class A Shares	\$674	\$1,045	\$1,439	\$2,538
Class C Shares	\$233	\$776	\$1,345	\$2,894
Class I Shares	\$132	\$471	\$834	\$1,855

You would pay the following expenses if you did not redeem your shares:

	One Year	Three Years	Five Years	Ten Years
Class C Shares	\$336	\$776	\$1,345	\$2,894

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the fiscal year ended October 31, 2025, the portfolio turnover rate for the Fund was 0% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks diverse exposure to macro trading opportunities such as significant price trends, both up and down, across asset classes, geographies and time horizons. The Fund may take long and/or short positions in asset classes, and the Fund's advisor dynamically adjusts its exposure to individual asset classes utilizing trend-following and macro trading approaches. As a component of its overall investment process, the Fund's advisor may utilize certain quantitative models and methodologies to guide its investment approach or security selection although the use of such models and methodologies may vary based on market factors and economic trends, as determined by the advisor.

The Fund seeks to achieve its investment objective by investing directly and/or indirectly through its wholly-owned subsidiary organized under the laws of the Cayman Islands (the "Subsidiary") in securities and derivative instruments including, but not limited to, equity index futures and options, swaps on equity index futures, equity swaps, interest rate futures and options, fixed income futures and options, swaps on fixed income futures, commodity and commodity index-linked futures and options, swaps on commodity and commodity index-linked futures, currency futures and options, swaps on currency futures, currency forwards and equity-, fixed income-, and commodity-notes. When used in this Prospectus, the term "Fund" includes the Subsidiary and the term "invest" includes investments the Fund makes directly and through the Subsidiary. There are no geographic limits on the Fund's holdings and the Fund will have exposure to U.S. and non-U.S. securities and currencies.

In addition, the Fund may have exposure to issuers of any size and credit quality. The Fund also invests a significant portion of its assets in investment grade money market instruments, which may include, but are not limited to, U.S. government securities, U.S. government agency securities, short-term fixed income securities, repurchase agreements, money market mutual fund shares, and cash and cash equivalents. The Fund's money market instrument holdings may serve as collateral for the Fund's derivative positions and may also earn income for the fund. The Fund's return is expected to be derived principally from changes in the value of securities and its portfolio is expected to consist principally of securities.

The Fund's use of futures, forwards, swaps and certain other financial instruments will have the economic effect of financial leverage. Financial leverage magnifies the exposure to the swings in prices of an asset class underlying a financial instrument and results in increased volatility, which means that the Fund has the potential for greater gains and losses, than if the Fund did not use financial instruments with leverage. A decline in the Fund's assets due to losses magnified by the financial instruments providing leveraged exposure may require the Fund to liquidate portfolio positions when it may not be advantageous to do so in order to satisfy its obligations, to meet redemption requests or to meet the applicable requirements of the 1940 Act, and the rules thereunder.

The Fund will enter into short positions, and it may use futures and swaps or sell a security short to do so. For example, the Fund may enter into a futures contract pursuant to which it agrees to sell an asset (that it does not currently own) at a specified price at a specified point in the future. This gives the Fund a short position with respect to the asset. At times, the Fund may have significant short positions.

The Fund intends to make investments through the Subsidiary and may invest up to 25% of its total assets in the Subsidiary. The Fund will invest in the Subsidiary primarily to gain exposure to the commodities markets and crypto assets within the limitations of the U.S. federal tax laws, rules and regulations that apply to regulated investment companies. Generally, the Subsidiary will invest in long and short commodity-linked futures and swaps, but it may also invest in other types of futures, swaps and options, as well as certain money market instruments, including U.S. government securities, money market fund shares, repurchase agreements and other high-quality, short-term fixed income instruments. The primary purpose of the money market instruments held by the Subsidiary will be to serve as collateral for the Subsidiary's derivative positions; however, these instruments may also earn income for the Subsidiary. In addition, the Subsidiary may also invest in exchange-traded products that are listed and traded on U.S. exchanges and primarily hold crypto assets (i.e., bitcoin, ether, or other cryptocurrencies) ("Crypto Asset ETPs") and futures contracts linked to crypto assets ("Crypto Asset Futures"). Crypto assets (also referred to as "cryptocurrencies", "virtual currencies", and "digital currencies") are digital assets that are designed to act as a medium of exchange. Crypto assets are not issued by a government, bank, or central organization, and they exist via online, peer-to-peer computer networks that host public transaction ledgers where transfers are recorded on a blockchain. The Fund, through the Subsidiary, may have exposure to crypto assets equal to up to 10% of the Fund's net assets. The Subsidiary is managed by the advisor and has the same objective as the Fund.

The Fund is "non-diversified," meaning that a relatively high percentage of its assets may be invested in a limited number of issuers of securities.

Principal Risks of Investing

Risk is inherent in all investing and you could lose money by investing in the Fund. A summary description of certain principal risks of investing in the Fund is set forth below. Before you decide whether to invest in the Fund, carefully consider these risk factors associated with investing in the Fund, which may cause investors to lose money. There can be no assurance that the Fund will achieve its investment objective. The principal risks described below reflect the aggregate operations of the Fund and its Subsidiary.

Market Risk. The market price of a security or instrument may decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic, political, or geopolitical conditions throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. The market value of a security or instrument also may decline because of factors that affect a particular industry or industries, such as tariffs, labor shortages or increased production costs and competitive conditions within an industry. In addition, local, regional or global events such as war, acts of terrorism, international conflicts, trade disputes, supply chain disruptions, cybersecurity events, the spread of infectious illness or other public health issues, natural disasters or climate events, or other events could have a significant impact on a security or instrument. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market.

Derivatives Risk. Derivatives include instruments and contracts that are based on and valued in relation to one or more underlying securities, financial benchmarks, indices, or other reference obligations or measures of value. Major types of derivatives include futures, options, swaps and forward contracts. Using derivatives exposes the Fund to

additional or heightened risks, including leverage risk, liquidity risk, valuation risk, market risk, counterparty risk, and credit risk. Derivatives transactions can be highly illiquid and difficult to unwind or value, they can increase Fund volatility, and changes in the value of a derivative held by the Fund may not correlate with the value of the underlying instrument or the Fund's other investments. Many of the risks applicable to trading the instruments underlying derivatives are also applicable to derivatives trading. However, derivatives are subject to additional risks such as operational risk, including settlement issues, and legal risk, including that underlying documentation is incomplete or ambiguous. For derivatives that are required to be cleared by a regulated clearinghouse, other risks may arise from the Fund's relationship with a brokerage firm through which it submits derivatives trades for clearing, including in some cases from other clearing customers of the brokerage firm.

Futures Risk. The Fund's use of futures contracts expose the Fund to leverage and tracking risks because a small investment in futures contracts may produce large losses and futures contracts may not be perfect substitutes for securities. The value of a futures contract tends to increase and decrease in correlation with the value of the underlying instrument. Risks of futures contracts may arise from an imperfect correlation between movements in the price of the futures and the price of the underlying instrument. The Fund's use of futures contracts exposes the Fund to leverage risk because of the small margin requirements relative to the value of the futures contract. A relatively small market movement will have a proportionately larger impact on the funds that the Fund has deposited or will have to deposit with a broker to maintain its futures position. Leverage can lead to large losses as well as gains. While futures contracts are generally liquid instruments, under certain market conditions they may become illiquid. Futures exchanges may impose daily or intraday price change limits and/or limit the volume of trading. Additionally, government regulation may further reduce liquidity through similar trading restrictions. As a result, the Fund may be unable to close out its futures contracts at a time that is advantageous. The price of futures can be highly volatile; using them could lower total return, and the potential loss from futures could exceed the Fund's initial investment in such contracts.

Swaps Risk. A swap is a two-party contract that generally obligates the parties to exchange payments based upon a specified reference security, index or index component. Swaps can involve greater risks than direct investment in securities or other similar instruments, because swaps may be leveraged and are subject to counterparty risk (e.g., the risk that the other party to the transaction defaults on its obligations), credit risk and valuation risk (i.e., swaps may be difficult to value). Swaps may also be considered illiquid. It may not be possible for the Fund to liquidate a swap position at an advantageous time or price, which may result in significant losses.

Options Risk. Purchasing and writing put and call options are highly specialized activities and entail greater than ordinary investment risks. The Fund may not fully benefit from or may lose money on an option if changes in its value do not correspond as anticipated to changes in the value of the underlying securities. If the Fund is not able to sell an option held in its portfolio, it would have to exercise the option to realize any profit and would incur transaction costs upon the purchase or sale of the underlying securities. Ownership of options involves the payment of premiums, which may adversely affect the Fund's performance. To the extent that the Fund invests in over-the-counter options, the Fund may be exposed to counterparty risk.

Forwards Risk. Forwards are not exchange-traded and therefore no clearinghouse or exchange stands ready to meet the obligations of the contracts. Thus, the Fund faces the risk that its counterparties may not perform their obligations. Forward contracts are not regulated by the Commodity Futures Trading Commission (the "CFTC") and therefore, the Fund will not receive any benefit of CFTC regulation when trading forward.

Speculative Exposure Risk. Gains or losses from speculative positions in a derivative may be much greater than the derivative's original cost. For example, potential losses from swaps and speculative short sales are unlimited.

Commodity Exposure Risk. The Fund's and the Subsidiary's investments in commodity-linked derivative instruments may subject the Fund to greater volatility than investments in traditional securities, particularly if the investments involve leverage. The value of commodity-linked derivatives instruments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or sectors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and international economic, political and regulatory developments. Use of leveraged commodity-linked derivatives

creates an opportunity for increased return but, at the same time, creates the possibility for greater loss (including the likelihood of greater volatility of the Fund's NAV), and there can be no assurance that the Fund's use of leverage will be successful.

Equity Risk. The Fund may obtain exposure to equity securities. The value of equity securities may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or factors relating to specific companies in which the Fund invests.

Fixed Income Securities Risk. The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to changes in an issuer's credit rating or market perceptions about the creditworthiness of an issuer. Generally, fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, and longer-term and lower rated securities are more volatile than shorter-term and higher rated securities.

Foreign Investment Risk. The prices of foreign securities may be more volatile than the prices of securities of U.S. issuers because of economic and social conditions abroad, political developments, and changes in the regulatory environments of foreign countries. Changes in exchange rates and interest rates, and the imposition of sanctions, confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and/or other governments may adversely affect the values of the Fund's foreign investments. Foreign companies are generally subject to different legal and accounting standards than U.S. companies, and foreign financial intermediaries may be subject to less supervision and regulation than U.S. financial firms. Foreign securities include American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs"). Unsponsored ADRs and GDRs are organized independently and without the cooperation of the foreign issuer of the underlying securities, and involve additional risks because U.S. reporting requirements do not apply. In addition, the issuing bank may deduct shareholder distribution, custody, foreign currency exchange, and other fees from the payment of dividends. Emerging markets tend to be more volatile than the markets of more mature economies and generally have less diverse and less mature economic structures and less stable political systems than those of developed countries.

Repurchase Agreement Risk. Repurchase agreements typically involve the acquisition by the Fund of fixed-income securities from a selling financial institution such as a bank or broker-dealer. The Fund may incur a loss if the other party to a repurchase agreement is unwilling or unable to fulfill its contractual obligations to repurchase the underlying security.

Counterparty Risk. The Fund will be exposed to the credit of the counterparties to over-the-counter ("OTC") derivative contracts and repurchase agreements and their ability to satisfy the terms of the agreements, which exposes the Fund to the risk that the counterparties may default on their obligations to perform under the agreements. In the event of a bankruptcy or insolvency of a counterparty, the fund could experience delays in liquidating the positions and significant losses, including declines in the value of its investment during the period in which the Fund seeks to enforce its rights, inability to realize any gains on its investment during such period, loss of collateral and fees and expenses incurred in enforcing its rights.

Credit Risk. If an issuer or guarantor of a debt security held by the Fund or a counterparty to a financial contract with the Fund defaults or is downgraded or is perceived to be less creditworthy, or if the value of the assets underlying a security declines, the value of the Fund's portfolio will typically decline.

Interest Rate Risk. Generally fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, with longer-term securities being more sensitive than shorter-term securities. For example, the price of a security with a three-year duration would be expected to drop by approximately 3% in response to a 1% increase in interest rates. Generally, the longer the maturity and duration of a bond or fixed rate loan, the more sensitive it is to this risk. Falling interest rates also create the potential for a decline in the Fund's income. Changes in governmental policy, rising inflation rates, and general economic developments, among other factors, could cause interest rates to increase and could have a substantial and immediate effect on the values of the Fund's investments. In addition, a potential rise in interest rates may result in periods of volatility and increased redemptions that might require the Fund to liquidate portfolio securities at disadvantageous prices and times.

Leveraging Risk. Certain Fund transactions, such as entering into futures contracts, options and short sales, may give rise to a form of leverage. Leverage can magnify the effects of changes in the value of the Fund's investments and make the Fund more volatile. Leverage creates a risk of loss of value on a larger pool of assets than the Fund would otherwise have had, potentially resulting in the loss of all assets. The Fund may also have to sell assets at inopportune times to satisfy its obligations in connection with such transactions.

Liquidity Risk. The Fund may not be able to sell some or all of the investments that it holds due to a lack of demand in the marketplace or other factors such as market turmoil, or if the Fund is forced to sell an illiquid asset to meet redemption requests or other cash needs it may only be able to sell those investments at a loss. Illiquid assets may also be difficult to value.

Short Sales Risk. In connection with a short sale of a security or other instrument, the Fund is subject to the risk that instead of declining, the price of the security or other instrument sold short will rise. If the price of the security or other instrument sold short increases between the date of the short sale and the date on which the Fund replaces the security or other instrument borrowed to make the short sale, the Fund will experience a loss, which is theoretically unlimited since there is a theoretically unlimited potential for the market price of a security or other instrument sold short to increase. Shorting options or futures may have an imperfect correlation to the assets held by the Fund and may not adequately protect against losses in or may result in greater losses for the Fund's portfolio.

Currency Risk. The values of investments in securities denominated in foreign currencies increase or decrease as the rates of exchange between those currencies and the U.S. dollar change. Currency conversion costs and currency fluctuations could erase investment gains or add to investment losses. Currency exchange rates can be volatile and are affected by factors such as general economic conditions, the actions of the United States and foreign governments or central banks, the imposition of currency controls, and speculation.

Lack of Correlation Risk; Hedging Risk. There can be no assurance that the Fund's hedges will be effective. Any decrease in negative correlation or increase in positive correlation between the positions the Advisor anticipated would be offsetting (such as short and long positions in securities or currencies held by the Fund) could result in significant losses for the Fund.

Crypto Asset Risk. Crypto assets, such as bitcoin and ether, are digital assets that are designed to act as a medium of exchange. Despite being referred to as "currencies," crypto assets are not widely accepted as a medium of exchange, and there is no guarantee that they will ever be accepted as such. The value of the Fund's indirect investments in crypto assets, through Crypto Asset ETPs and Crypto Asset Futures, is subject to fluctuations in the value of the underlying crypto assets. The value of a crypto asset is determined by the supply of and demand for the crypto asset in the global market, which consists of transactions on electronic exchanges. Pricing on exchanges and other venues can be volatile and can adversely affect the value of the Fund's exposure to the crypto asset. Currently, there is relatively limited use of crypto assets in the retail and commercial marketplace in comparison to the relatively large use of crypto assets by speculators, thus contributing to price volatility that could adversely affect the Fund's investments. Crypto asset transactions are irrevocable, and stolen or incorrectly transferred crypto assets may be irretrievable. As a result, any incorrectly executed transactions could adversely affect the value of the Fund's investments in Crypto Asset ETPs and Crypto Asset Futures.

Crypto assets generally operate without central authority (such as a bank) and are not backed by any government; therefore crypto assets are not subject to the same degree of regulation as are registered U.S. securities. The reporting, accounting and auditing standards for crypto assets may differ from the standards for registered U.S. securities. Due to the unregulated nature and lack of transparency surrounding the operations of crypto asset platforms, which may experience fraud, manipulation, security failures or operational problems, as well as the wider crypto asset market, the value of a crypto asset and, consequently, the value of the Fund's investments in Crypto Asset ETPs and Crypto Asset Futures may be adversely affected.

The Fund will indirectly bear its proportionate share of management fees and other expenses that are charged by Crypto Asset ETPs in addition to its own direct expenses and will pay brokerage commissions in connection with the purchase and sale of shares of Crypto Asset ETPs. Like other exchange-traded products, the shares of Crypto Asset ETPs may be bought and sold in the secondary market and may trade at a premium or discount to their

net asset value. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity in the secondary market, in which case such premiums or discounts may be significant and the bid-ask spread could widen. Although the shares are listed for trading on an exchange, it cannot be assumed that an active trading market for the shares will be maintained. The lack of an active trading market for the shares may result in limited market liquidity and losses when selling the shares.

In addition, Crypto Asset ETPs have a limited number of financial institutions that may act as authorized participants (“Aps”) and there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent that (i) Aps exit the business or otherwise become unable to process creation and/or redemption orders and no other Aps step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform such functions, shares may trade at a material discount to NAV, the bid-ask spread could widen, and shares could face trading halts and/or delisting.

Crypto Asset ETPs are not registered investment companies under the 1940 Act or commodity pools under the Commodity Exchange Act (“CEA”), and therefore investors in Crypto Asset ETPs do not have the regulatory protections associated with ownership of shares in an investment company registered under the 1940 Act or the protections afforded by the CEA. Moreover, as sponsors of Crypto Asset ETPs have a limited track record in operating investment vehicles that specifically deal with crypto assets, their experience may be inadequate or unsuitable to manage them.

Valuation Risk. The sales price the Fund could receive for any particular portfolio investment may differ from the Fund’s valuation of the investment, particularly for securities that trade in thin or volatile markets or that are valued by the Advisor using a fair value methodology. Investors who purchase or redeem Fund shares on days when the Fund is holding fair-valued securities may receive fewer or more shares or lower or higher redemption proceeds than they would have received if the Advisor had not fair-valued the security or had used a different valuation methodology.

Management and Strategy Risk. The value of your investment depends on the judgment of the Fund’s advisor about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incorrect. The Fund also bears the risk that the proprietary model used by the portfolio manager will not be successful in identifying investments that will help the Fund achieve its investment objective, causing the Fund to underperform other funds with a similar investment objective.

Subsidiary Risk. By investing in the Subsidiary, the Fund will be indirectly exposed to the risks associated with the Subsidiary’s investments. The Subsidiary is not registered under the 1940 Act and, unless otherwise noted, is not itself subject to all of the investor protections of the 1940 Act. Changes in the laws of the United States, the U.S. states or the Cayman Islands, under which the Fund and Subsidiary are organized and operated, as applicable, could prevent the Fund or the Subsidiary from operating as described in this Prospectus and could negatively affect the Fund and its shareholders.

Non-Diversification Risk. The Fund is classified as “non-diversified,” which means the Fund may invest a larger percentage of its assets in the securities of a smaller number of issuers than a diversified fund. Investment in securities of a limited number of issuers exposes the Fund to greater market risk and potential losses than if its assets were diversified among the securities of a greater number of issuers.

Tax Risk. To qualify for the tax treatment available to regulated investment companies under the Code, the Fund must derive at least 90% of its gross income for each taxable year from sources treated as “qualifying income.” Income derived from direct investments in commodities or certain crypto assets is not “qualifying income.” In addition, the Internal Revenue Service (the “IRS”) has issued a revenue ruling concluding that income and gains from certain commodity-linked derivatives does not constitute “qualifying income.” Investment through the Subsidiary is expected to allow the Fund to gain exposure to the commodity markets and crypto assets within the limitations of the federal tax law requirements applicable to regulated investment companies. The tax treatment of the Fund’s investment in commodity interests or in the Subsidiary could nevertheless be adversely affected by future legislation or Treasury regulations.

Investment through the Subsidiary may affect the timing and character of income and gain recognized by the Fund, and of distributions to shareholders. For example, the tax treatment of any gains/losses from trading in 1256 futures contracts, such as exchange-traded commodity futures contracts, are generally taxed 60% as long-term capital gains/losses and 40% short-term capital gains/losses. However, because the Subsidiary is a “controlled foreign corporation” for U.S. federal income tax purposes, any income or gain recognized in respect of its investments in 1256 futures contracts will be passed through to the Fund as ordinary income, and distributions attributable to such income and gains will generally be taxable to shareholders as ordinary income.

Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The prices of, and income generated by, securities held by the Fund may decline in response to various factors directly related to the issuers of such securities, including reduced demand for an issuer’s goods or services, poor management performance, major litigation, investigations or other controversies related to the issuer, changes in the issuer’s financial condition or credit rating, changes in government regulation affecting the issuer or its competitive environment, and strategic initiatives such as mergers, acquisitions or dispositions and the market response to any such initiatives. An individual security may also be affected by factors related to the industry or sector of the issuer or the securities markets as a whole, and conversely an industry or sector or the securities markets may be affected by a change in financial condition or another event affecting a single issuer. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole. At times, the Fund may invest more significantly in a single issuer, which could increase the Fund’s volatility and the risk of loss arising from the factors described above.

Government-Sponsored Entities Risk. The Fund’s investment in U.S. government obligations may include securities issued or guaranteed as to principal and interest by the U.S. government, or its agencies or instrumentalities. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) when it is not obligated to do so.

Recent Market Events. Periods of market volatility may occur in response to market events, public health emergencies, natural disasters or climate events, and other economic, political, and global macro factors. U.S. and international markets have recently experienced, and may continue to experience, periods of significant volatility due to various factors, including uncertainty regarding inflation and central banks’ interest rate changes, the possibility of a national or global recession, trade tensions and tariffs, and political and geopolitical events. In addition, wars or threats of war and aggression, such as Russia’s invasion of Ukraine and conflicts among nations and militant groups in the Middle East, have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments. Additionally, since the change in the U.S. presidential administration in 2025, the administration has pursued an aggressive foreign policy agenda, including actual or potential imposition of tariffs, which may have consequences on the United States’ relations with foreign countries, the economy, and markets generally. These and other similar events could be prolonged and could adversely affect the value and liquidity of the Fund’s investments, impair the Fund’s ability to satisfy redemption requests, and negatively impact the Fund’s performance.

Cybersecurity Risk. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause the Fund, the advisor and/or other service providers (including custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality. In an extreme case, a shareholder’s ability to exchange or redeem Fund shares may be affected. The use of artificial intelligence and machine learning could exacerbate these risks. Issuers of securities in which the Fund invests are also subject to cybersecurity risks, and the value of those securities could decline if the issuers experience cybersecurity incidents.

Performance

The bar chart and table below provide some indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year to year for Class A Shares and by showing how the average annual total returns of each class of the Fund compare with the average annual total returns of the Bloomberg Global Aggregate Bond Index, a broad-based securities market index, and the Credit Suisse Managed Futures Liquid Index. Performance for classes other

than those shown may vary from the performance shown to the extent the expenses for those classes differ. Effective February 28, 2026, the Fund changed its principal investment strategies to reflect the utilization of trend-following and macro trading approaches, and to add exposure to certain crypto assets. Consequently, performance during periods prior to February 28, 2026, does not reflect the Fund's current investment strategies, and the Fund's performance may have differed if the Fund's current investment strategies had been in place. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at the Fund's website <https://www.mast-funds.com/>, or by calling the Fund at 1-833-829-0010.

Calendar-Year Total Return (before taxes) for the Fund – Class A Shares

For each calendar year at NAV

Highest Calendar Quarter Return at NAV	13.44%	Quarter Ended 3/31/2022
Lowest Calendar Quarter Return at NAV	(12.81)%	Quarter Ended 6/30/2025

Average Annual Total Returns <i>(for periods ended December 31, 2025)</i>			
	One Year	Five Years	Ten Years
Class A – Return Before Taxes	(10.59)%	0.48%	(0.32)%
Class A – Return After Taxes on Distributions*	(11.17)%	(1.53)%	(1.47)%
Class A – Return After Taxes on Distributions and Sale of Fund Shares*	(5.86)%	(0.15)%	(0.55)%
Class C – Return Before Taxes	(6.28)%	0.83%	(0.53)%
Class I – Return Before Taxes	(5.22)%	1.84%	0.46%
Bloomberg Global Aggregate Bond Index (reflects no deduction for fees, expenses or taxes)	8.17%	(2.15)%	1.26%
Credit Suisse Managed Futures Liquid Index (reflects no deduction for fees, expenses or taxes)	(4.04)%	2.24%	0.55%

* After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor

Manteio Scalable Technologies LLC ("Mast Investments" or the "Advisor") serves as investment advisor to the Fund.

Portfolio Manager

Yung-Shin Kung, Portfolio Manager of the Advisor, is the Lead Portfolio Manager of the Fund. Mr. Kung has been primarily responsible for the day-to-day management of the Fund's portfolio since November 2015.

Purchase and Sale of Fund Shares

To purchase shares of the Fund, you must invest at least the minimum amount.

Minimum Investments	To Open Your Account	To Add to Your Account by Check	To Add to Your Account by Exchange	To Add to Your Account by Wire
Class A Shares and Class C Shares				
Direct Regular Accounts	\$100	\$100	\$250	\$500
Direct Retirement Accounts	\$100	\$100	\$250	\$500
Automatic Investment Plan	\$100	\$100	\$250	\$500
Gift Account For Minors	\$100	\$100	\$250	\$500
Class I Shares				
Direct Regular Accounts	\$100,000	\$100,000	\$100,000	\$1,000,000
Direct Retirement Accounts	\$100,000	\$100,000	\$100,000	\$1,000,000
Automatic Investment Plan	\$100,000	\$100,000	\$100,000	\$1,000,000
Gift Account For Minors	\$100,000	\$100,000	\$100,000	\$1,000,000

Fund shares are redeemable on any business day the New York Stock Exchange (the "NYSE") is open for business, by written request, by telephone at 1-833-829-0010, or through your broker. Redemptions will be paid by automated clearing house funds ("ACH"), check or wire transfer. The Fund or the Advisor may waive any of the minimum initial and subsequent investment amounts.

Tax Information

The Fund's distributions are generally taxable, and will ordinarily be taxed as ordinary income, qualified dividend income or capital gains, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. Shareholders investing through such tax-advantaged arrangements may be taxed later upon withdrawal of monies from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

SUMMARY SECTION – MAST MULTIALTERNATIVE STRATEGY FUND

Investment Objective

The Mast Multialternative Strategy Fund (the “Fund”) seeks positive absolute returns.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.** You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in Class A Shares of the Fund. More information about these fees and other discounts is available from your financial professional and in the section titled “Purchase of Shares” on page 39 of the Prospectus and under “Waivers and Discounts Available from Intermediaries and Conversion Policies” on page 58 the Prospectus.

Shareholder Fees (fees paid directly from your investment)	Class A	Class I
Maximum Sales Charge (Load) Imposed on purchases (as a percentage of offering price)	5.25%	None
Maximum Deferred Sales Charge (Load) (as a percentage of purchase price)	None ¹	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)		
Management Fees	1.04%	1.04%
Distribution and/or Service (12b-1) Fees	0.25%	None
Other Expenses ²	0.25%	0.25%
Total Annual Fund Operating Expenses	1.54%	1.29%
Fees Waived and/or Expenses Reimbursed ³	(0.44)%	(0.44)%
Total Annual Fund Operating Expenses After Waiving Fees and/or Reimbursing Expenses^{2,3}	1.10%	0.85%

¹ Purchases of Class A shares of \$1 million or more may be subject to a 1.00% deferred sales charge on redemptions within 12 months of purchase.

² The Fund invests in a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands. “Other expenses” include expenses of both the Fund and the wholly-owned subsidiary.

³ The Fund’s advisor has contractually agreed to waive its fees and/or pay for operating expenses of the Fund to ensure that total annual fund operating expenses (excluding any taxes, leverage interest, brokerage commissions, dividend and interest expenses on short sales, acquired fund fees and expenses (as determined in accordance with SEC Form N-1A), professional fees related to services for the collection of foreign tax reclaims, expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation expenses) do not exceed 1.10% and 0.85% of the average daily net assets of Class A shares and Class I shares, respectively, of the Fund. This agreement is in effect through February 28, 2027, and it may be terminated before that date only by the Trust’s Board of Trustees. The Fund’s advisor is permitted to seek reimbursement from the Fund, subject to certain limitations, of fees waived or payments made by the advisor to the Fund for a period ending three years after the date of the waiver or payment. Such reimbursement may be requested from the Fund if the reimbursement will not cause the Fund’s annual expense ratio to exceed the lesser of (a) the expense limitation in effect at the time such fees were waived or payments made, or (b) the expense limitation in effect at the time of the reimbursement. Reimbursements of fees waived or payments made will be made on a “first in, first out” basis so that the oldest fees waived or payments are satisfied first.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The example reflects the Fund's contractual fee waiver and/or expense reimbursement only for the term of the contractual fee waiver and/or expense reimbursement.

Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	One Year	Three Years	Five Years	Ten Years
Class A Shares	\$631	\$945	\$1,281	\$2,228
Class I Shares	\$87	\$366	\$665	\$1,518

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the fiscal year ended October 31, 2025, the portfolio turnover rate for the Fund was 458% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to achieve its investment objective by utilizing a macro-aware investment process to allocate capital across a range of investment strategies. The Fund may invest in a broad range of instruments, including equities, American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs"), other mutual funds, exchange-traded funds ("ETFs"), including mutual funds and ETFs managed by the Advisor, warrants, bonds (both investment grade and below investment grade (commonly referred to as "high yield securities" or "junk bonds")), currencies, commodities, futures, exchange-traded and over-the-counter put and call options (both covered and uncovered) and total return and excess return swaps. The Fund may invest in such instruments directly, indirectly through fund of funds arrangements, or, in the case of commodities and certain commodity-linked instruments, indirectly, by investing in its wholly-owned subsidiary organized under the laws of the Cayman Islands (the "Subsidiary") which invests in such commodities and commodity-linked instruments. When used in this Prospectus, the term "Fund" includes the Subsidiary and the term "invest" includes investments the Fund makes directly, through the Subsidiary, and through acquired funds. The Fund also may invest in cash and cash equivalents. As a result of the Fund's use of derivatives, the Fund may hold significant amounts of high-quality, short-term securities, including U.S. Treasuries, shares of money market funds and repurchase agreements. The Fund may also invest in high-yield securities to earn income, as well as to achieve its investment objective. The Fund may invest in bonds of any maturity and duration. The Fund may invest globally (including in emerging markets) and there are no geographic limits on the Fund's holdings.

The Fund's advisor primarily, but not exclusively, allocates the Fund's assets to strategies which take directional positions (*i.e.*, positions that depend upon an up or down price move in an instrument or market for success) and/or relative value positions (*i.e.*, positions that depend on price relationships between various instruments or markets and seek to profit from pricing inefficiencies) through long and/or short exposures in instruments across all major asset classes. The instruments in which the Fund may invest may be U.S. dollar or non-U.S. dollar denominated. The Fund may have exposure to issuers of any size and credit quality. The percentage of the Fund's portfolio exposed to an asset class and geographic region will vary from time to time. The Fund intends to engage in active and frequent trading.

The Fund's advisor utilizes a process-driven approach that blends its proprietary quantitative techniques with disciplined oversight in an effort to deliver positive absolute returns. The advisor's investment process begins with statistical research and fundamental analysis of various investment strategies spanning all major public markets. The advisor applies its proprietary quantitative models to arrive at a subset of liquid investment strategies that the advisor believes are suitable for the Fund. These investment strategies include, among others, those that are Fundamental, which focus on price and

relative price determinants such as measures of carry (*i.e.*, the yield differences between one instrument and another) and appraisal of fair value, and Tactical, which focus on market structure and the behavior of market agents including lead-lag effects (*i.e.*, time dependent correlation relationships), liquidity provisioning and buffering, and positioning dynamics (*i.e.*, exposure patterns or sensitivities). The advisor also employs macroeconomic and probabilistic modeling to guide its allocation decisions and select investments that the advisor believes will promote the maintenance of a balanced and efficient Fund risk profile by explicitly considering how the evolution of markets and the behavior of market participants impact the performance and interaction of strategies.

The Fund may sell call options pursuant to which the purchaser pays the Fund a premium in exchange for the right to purchase the security underlying the option at a specified price (the “strike price”) within a specified time period or at a specified future date. The call options the Fund sells may either be covered (*i.e.*, where the Fund holds the underlying security) or uncovered (*i.e.*, where the Fund does not hold the underlying security). The seller of an uncovered call option assumes the risk of a theoretically unlimited increase in the market price of the underlying security above the strike price of the option, and thus the seller’s potential for loss is unlimited.

The Fund will primarily gain exposure to commodities and commodity-linked instruments through investments in the Subsidiary. The Subsidiary will invest in (long and short) commodity-linked futures and swaps, as well as certain money market instruments, including U.S. government securities, money market fund shares, repurchase agreements and other high-quality, short-term fixed income instruments. The primary purpose of the money market instruments held by the Subsidiary will be to serve as collateral for the Subsidiary’s derivative positions; however, these instruments may also earn income for the Subsidiary. In addition, the Subsidiary may also invest in exchange-traded products that are listed and traded on U.S. exchanges and primarily hold crypto assets (*i.e.*, bitcoin, ether, or other cryptocurrencies) (“Crypto Asset ETPs”) and futures contracts linked to crypto assets (“Crypto Asset Futures”). Crypto assets (also referred to as “cryptocurrencies”, “virtual currencies”, and “digital currencies”) are digital assets that are designed to act as a medium of exchange. Crypto assets are not issued by a government, bank, or central organization, and they exist via online, peer-to-peer computer networks that host public transaction ledgers where transfers are recorded on a blockchain. The Fund, through the Subsidiary, may have exposure to crypto assets equal to up to 10% of the Fund’s net assets. The Subsidiary is managed by the advisor and has the same investment objective as the Fund. The Fund may invest up to 25% of its total assets in the Subsidiary. Investment in the Subsidiary is expected to provide the Fund with commodity and crypto assets exposure within the limitations of the U.S. federal tax requirements that apply to regulated investment companies. Investments in other funds managed by the Fund’s advisor may provide the Fund with exposure to other securities and financial instruments in addition to commodities and commodity-linked instruments.

The Fund is “non-diversified,” meaning that a relatively high percentage of its assets may be invested in a limited number of issuers of securities.

Principal Risks of Investing

Risk is inherent in all investing and you could lose money by investing in the Fund. A summary description of certain principal risks of investing in the Fund is set forth below. Before you decide whether to invest in the Fund, carefully consider these risk factors associated with investing in the Fund, which may cause investors to lose money. There can be no assurance that the Fund will achieve its investment objective. The principal risks described below reflect the aggregate operations of the Fund and its Subsidiary.

Market Risk. The market price of a security or instrument may decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic, political, or geopolitical conditions throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. The market value of a security or instrument also may decline because of factors that affect a particular industry or industries, such as tariffs, labor shortages or increased production costs and competitive conditions within an industry. In addition, local, regional or global events such as war, acts of terrorism, international conflicts, trade disputes, supply chain disruptions, cybersecurity events, the spread of infectious illness or other public health issues, natural disasters or climate events, or other events could have a significant impact on a security or instrument. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market.

Equity Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or factors relating to specific companies in which the Fund invests.

Small-Cap and Mid-Cap Company Risk. The securities of small-capitalization and mid-capitalization companies may be subject to more abrupt or erratic market movements and may have lower trading volumes or more erratic trading than securities of larger, more established companies or market averages in general. In addition, such companies typically are more likely to be adversely affected than large capitalization companies by changes in earning results, business prospects, investor expectations or poor economic or market conditions.

Fixed Income Securities Risk. The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to changes in an issuer's credit rating or market perceptions about the creditworthiness of an issuer. Generally, fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, and longer-term and lower rated securities are more volatile than shorter-term and higher rated securities.

High Yield ("Junk") Bond Risk. High yield bonds are debt securities rated below investment grade (often called "junk bonds"). Junk bonds are speculative, involve greater risks of default, downgrade, or price declines and are more volatile and tend to be less liquid than investment-grade securities. Companies issuing high yield bonds are less financially strong, are more likely to encounter financial difficulties, and are more vulnerable to adverse market events and negative sentiments than companies with higher credit ratings.

Foreign Investment Risk. The prices of foreign securities may be more volatile than the prices of securities of U.S. issuers because of economic and social conditions abroad, political developments, and changes in the regulatory environments of foreign countries. Changes in exchange rates and interest rates, and the imposition of sanctions, confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and/or other governments may adversely affect the values of the Fund's foreign investments. Foreign companies are generally subject to different legal and accounting standards than U.S. companies, and foreign financial intermediaries may be subject to less supervision and regulation than U.S. financial firms. Foreign securities include ADRs and GDRs. Unsponsored ADRs and GDRs are organized independently and without the cooperation of the foreign issuer of the underlying securities, and involve additional risks because U.S. reporting requirements do not apply. In addition, the issuing bank may deduct shareholder distribution, custody, foreign currency exchange, and other fees from the payment of dividends. Emerging markets tend to be more volatile than the markets of more mature economies and generally have less diverse and less mature economic structures and less stable political systems than those of developed countries.

Emerging Markets Risk. The Fund may invest in companies organized or doing substantial business in emerging market or developing countries, as defined by the World Bank, International Finance Corporation, or included in any of the Morgan Stanley Capital International (MSCI) emerging market or other comparable indices. Many of the risks with respect to foreign investments are more pronounced for investments in issuers in developing or emerging market countries. Emerging market countries tend to have more government exchange controls, more volatile interest and currency exchange rates, less market regulation, and less developed and less stable economic, political and legal systems than those of more developed countries. There may be less publicly available and reliable information about issuers in emerging markets than is available about issuers in more developed markets. In addition, emerging market countries may experience high levels of inflation and may have less liquid securities markets and less efficient trading and settlement systems.

Derivatives Risk. Derivatives include instruments and contracts that are based on and valued in relation to one or more underlying securities, financial benchmarks, indices, or other reference obligations or measures of value. Major types of derivatives include futures, options, swaps and forward contracts. Using derivatives exposes the Fund to additional or heightened risks, including leverage risk, liquidity risk, valuation risk, market risk, counterparty risk, and credit risk. Derivatives transactions can be highly illiquid and difficult to unwind or value, they can increase Fund volatility, and changes in the value of a derivative held by the Fund may not correlate with the value of the underlying instrument or the Fund's other investments. Many of the risks applicable to trading the instruments

underlying derivatives are also applicable to derivatives trading. However, derivatives are subject to additional risks such as operational risk, including settlement issues, and legal risk, including that underlying documentation is incomplete or ambiguous. For derivatives that are required to be cleared by a regulated clearinghouse, other risks may arise from the Fund's relationship with a brokerage firm through which it submits derivatives trades for clearing, including in some cases from other clearing customers of the brokerage firm.

Futures Risk. The Fund's use of futures contracts expose the Fund to leverage and tracking risks because a small investment in futures contracts may produce large losses and futures contracts may not be perfect substitutes for securities. The value of a futures contract tends to increase and decrease in correlation with the value of the underlying instrument. Risks of futures contracts may arise from an imperfect correlation between movements in the price of the futures and the price of the underlying instrument. The Fund's use of futures contracts exposes the Fund to leverage risk because of the small margin requirements relative to the value of the futures contract. A relatively small market movement will have a proportionately larger impact on the funds that the Fund has deposited or will have to deposit with a broker to maintain its futures position. Leverage can lead to large losses as well as gains. While futures contracts are generally liquid instruments, under certain market conditions they may become illiquid. Futures exchanges may impose daily or intraday price change limits and/or limit the volume of trading. Additionally, government regulation may further reduce liquidity through similar trading restrictions. As a result, the Fund may be unable to close out its futures contracts at a time that is advantageous. The price of futures can be highly volatile; using them could lower total return, and the potential loss from futures could exceed the Fund's initial investment in such contracts.

Swaps Risk. A swap is a two-party contract that generally obligates the parties to exchange payments based upon a specified reference security, index or index component. Swaps can involve greater risks than direct investment in securities or other similar instruments, because swaps may be leveraged and are subject to counterparty risk (e.g., the risk that the other party to the transaction defaults on its obligations), credit risk and valuation risk (i.e., swaps may be difficult to value). Swaps may also be considered illiquid. It may not be possible for the Fund to liquidate a swap position at an advantageous time or price, which may result in significant losses.

Options Risk. Purchasing and writing put and call options are highly specialized activities and entail greater than ordinary investment risks. The Fund may not fully benefit from or may lose money on an option if changes in its value do not correspond as anticipated to changes in the value of the underlying securities. If the Fund is not able to sell an option held in its portfolio, it would have to exercise the option to realize any profit and would incur transaction costs upon the purchase or sale of the underlying securities. Ownership of options involves the payment of premiums, which may adversely affect the Fund's performance. To the extent that the Fund invests in over-the-counter options, the Fund may be exposed to counterparty risk.

Forwards Risk. Forwards are not exchange-traded and therefore no clearinghouse or exchange stands ready to meet the obligations of the contracts. Thus, the Fund faces the risk that its counterparties may not perform their obligations. Forward contracts also are not regulated by the Commodity Futures Trading Commission (the "CFTC") and therefore the Fund will not receive any benefit of CFTC regulation when trading forwards.

Speculative Exposure Risk. Gains or losses from speculative positions in a derivative may be much greater than the derivative's original cost. For example, potential losses from swaps and speculative short sales are unlimited.

Commodity Exposure Risk. The Fund's and the Subsidiary's investments in commodity-linked derivative instruments may subject the Fund to greater volatility than investments in traditional securities, particularly if the investments involve leverage. The value of commodity-linked derivative instruments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and international economic, political and regulatory developments. Use of leveraged commodity-linked derivatives creates an opportunity for increased return but, at the same time, creates the possibility for greater loss (including the likelihood of greater volatility of the Fund's NAV), and there can be no assurance that the Fund's use of leverage will be successful.

Leveraging Risk. Certain Fund transactions, such as entering into futures contracts, options and short sales, may give rise to a form of leverage. Leverage can magnify the effects of changes in the value of the Fund's investments and make the Fund more volatile. Leverage creates a risk of loss of value on a larger pool of assets than the Fund would otherwise have had, potentially resulting in the loss of all assets. The Fund may also have to sell assets at inopportune times to satisfy its obligations in connection with such transactions.

Arbitrage or Fundamental Risk. Employing arbitrage and alternative strategies has the risk that anticipated opportunities do not play out as planned, resulting in potentially reduced returns or losses to the Fund as it unwinds unsuccessful investments.

Convertible Securities Risk. Convertible securities are subject to market and interest rate risk and credit risk. When the market price of the equity security underlying a convertible security decreases the convertible security tends to trade on the basis of its yield and other fixed income characteristics, and is more susceptible to credit and interest rate risks. When the market price of such equity security rises, the convertible security tends to trade on the basis of its equity conversion features and be more exposed to market risk. Convertible securities are typically issued by smaller capitalized companies with stock prices that may be more volatile than those of other companies.

Currency Risk. The values of investments in securities denominated in foreign currencies increase or decrease as the rates of exchange between those currencies and the U.S. dollar change. Currency conversion costs and currency fluctuations could erase investment gains or add to investment losses. Currency exchange rates can be volatile and are affected by factors such as general economic conditions, the actions of the United States and foreign governments or central banks, the imposition of currency controls, and speculation.

Short Sales Risk. In connection with a short sale of a security or other instrument, the Fund is subject to the risk that instead of declining, the price of the security or other instrument sold short will rise. If the price of the security or other instrument sold short increases between the date of the short sale and the date on which the Fund replaces the security or other instrument borrowed to make the short sale, the Fund will experience a loss, which is theoretically unlimited since there is a theoretically unlimited potential for the market price of a security or other instrument sold short to increase. Shorting options or futures may have an imperfect correlation to the assets held by the Fund and may not adequately protect against losses in or may result in greater losses for the Fund's portfolio.

Counterparty Risk. The Fund will be exposed to the credit of the counterparties to over-the-counter ("OTC") derivative contracts and repurchase agreements and their ability to satisfy the terms of the agreements, which exposes the fund to the risk that the counterparties may default on their obligations to perform under the agreements. In the event of a bankruptcy or insolvency of a counterparty, the Fund could experience delays in liquidating the positions and significant losses, including declines in the value of its investment during the period in which the Fund seeks to enforce its rights, inability to realize any gains on its investment during such period, loss of collateral and fees and expenses incurred in enforcing its rights.

Credit Risk. If an issuer or guarantor of a debt security held by the Fund or a counterparty to a financial contract with the Fund defaults or is downgraded or is perceived to be less creditworthy, or if the value of the assets underlying a security declines, the value of the Fund's portfolio will typically decline.

Interest Rate Risk. Generally fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, with longer-term securities being more sensitive than shorter-term securities. For example, the price of a security with a three-year duration would be expected to drop by approximately 3% in response to a 1% increase in interest rates. Generally, the longer the maturity and duration of a bond or fixed rate loan, the more sensitive it is to this risk. Falling interest rates also create the potential for a decline in the Fund's income. Changes in governmental policy, rising inflation rates, and general economic developments, among other factors, could cause interest rates to increase and could have a substantial and immediate effect on the values of the Fund's investments. In addition, a potential rise in interest rates may result in periods of volatility and increased redemptions that might require the Fund to liquidate portfolio securities at disadvantageous prices and times.

ETF and Mutual Fund Risk. Investing in ETFs or mutual funds (including other funds managed by the Fund's advisor) will provide the Fund with exposure to the risks of owning the underlying securities the ETFs or mutual funds hold. Shares of ETFs typically trade on securities exchanges and may at times trade at a premium or discount to their net asset values. In addition, an ETF or a mutual fund, if the mutual fund is an index fund, may not replicate exactly the performance of the benchmark index it seeks to track for a number of reasons, including transaction costs incurred by the ETF or mutual fund, the temporary unavailability of certain index securities in the secondary market, or discrepancies between the ETF or mutual fund and the index with respect to the weighting of securities or the number of securities held. It may be more expensive for the Fund to invest in an ETF or mutual fund than to own the portfolio securities of these investment vehicles directly. Investing in ETFs and mutual funds, which are investment companies, involves duplication of advisory fees and certain other expenses. The Fund will pay brokerage commissions in connection with the purchase and sale of shares of ETFs. In addition, the Fund may invest in underlying funds which invest a larger portion of their assets in one or more sectors than many other mutual funds, and thus will be more susceptible to negative events affecting those sectors.

Repurchase Agreement Risk. Repurchase agreements typically involve the acquisition by the Fund of fixed-income securities from a selling financial institution such as a bank or broker-dealer. The Fund may incur a loss if the other party to a repurchase agreement is unwilling or unable to fulfill its contractual obligations to repurchase the underlying security.

Lack of Correlation Risk; Hedging Risk. There can be no assurance that the Fund's hedges will be effective. Any decrease in negative correlation or increase in positive correlation between the positions the Advisor anticipated would be offsetting (such as short and long positions in securities or currencies held by the Fund) could result in significant losses for the Fund.

Liquidity Risk. The Fund may not be able to sell some or all of the investments that it holds due to a lack of demand in the marketplace or other factors such as market turmoil, or if the Fund is forced to sell an illiquid asset to meet redemption requests or other cash needs it may only be able to sell those investments at a loss. Illiquid assets may also be difficult to value.

Crypto Asset Risk. Crypto assets, such as bitcoin and ether, are digital assets that are designed to act as a medium of exchange. Despite being referred to as "currencies," crypto assets are not widely accepted as a medium of exchange, and there is no guarantee that they will ever be accepted as such. The value of the Fund's indirect investments in crypto assets, through Crypto Asset ETPs and Crypto Asset Futures, is subject to fluctuations in the value of the underlying crypto assets. The value of a crypto asset is determined by the supply of and demand for the crypto asset in the global market, which consists of transactions on electronic exchanges. Pricing on exchanges and other venues can be volatile and can adversely affect the value of the Fund's exposure to the crypto asset. Currently, there is relatively limited use of crypto assets in the retail and commercial marketplace in comparison to the relatively large use of crypto assets by speculators, thus contributing to price volatility that could adversely affect the Fund's investments. Crypto asset transactions are irrevocable, and stolen or incorrectly transferred crypto assets may be irretrievable. As a result, any incorrectly executed transactions could adversely affect the value of the Fund's investments in Crypto Asset ETPs and Crypto Asset Futures.

Crypto assets generally operate without central authority (such as a bank) and are not backed by any government; therefore crypto assets are not subject to the same degree of regulation as are registered U.S. securities. The reporting, accounting and auditing standards for crypto assets may differ from the standards for registered U.S. securities. Due to the unregulated nature and lack of transparency surrounding the operations of crypto asset platforms, which may experience fraud, manipulation, security failures or operational problems, as well as the wider crypto asset market, the value of a crypto asset and, consequently, the value of the Fund's investments in Crypto Asset ETPs and Crypto Asset Futures may be adversely affected.

The Fund will indirectly bear its proportionate share of management fees and other expenses that are charged by Crypto Asset ETPs in addition to its own direct expenses and will pay brokerage commissions in connection with the purchase and sale of shares of Crypto Asset ETPs. Like other exchange-traded products, the shares of Crypto Asset ETPs may be bought and sold in the secondary market and may trade at a premium or discount to their net asset value. This risk is heightened in times of market volatility, periods of steep market declines, and periods

when there is limited trading activity in the secondary market, in which case such premiums or discounts may be significant and the bid-ask spread could widen. Although the shares are listed for trading on an exchange, it cannot be assumed that an active trading market for the shares will be maintained. The lack of an active trading market for the shares may result in limited market liquidity and losses when selling the shares.

In addition, Crypto Asset ETPs have a limited number of financial institutions that may act as authorized participants (“APs”) and there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent that (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform such functions, shares may trade at a material discount to NAV, the bid-ask spread could widen, and shares could face trading halts and/or delisting.

Crypto Asset ETPs are not registered investment companies under the 1940 Act or commodity pools under the Commodity Exchange Act (“CEA”), and therefore investors in Crypto Asset ETPs do not have the regulatory protections associated with ownership of shares in an investment company registered under the 1940 Act or the protections afforded by the CEA. Moreover, as sponsors of Crypto Asset ETPs have a limited track record in operating investment vehicles that specifically deal with crypto assets, their experience may be inadequate or unsuitable to manage them.

Valuation Risk. The sales price the Fund could receive for any particular portfolio investment may differ from the Fund’s valuation of the investment, particularly for securities that trade in thin or volatile markets or that are valued by the Advisor using a fair value methodology. Investors who purchase or redeem Fund shares on days when the Fund is holding fair-valued securities may receive fewer or more shares or lower or higher redemption proceeds than they would have received if the Advisor had not fair-valued the security or had used a different valuation methodology.

Management and Strategy Risk. The value of your investment depends on the judgment of the Fund’s advisor about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incorrect. The Fund also bears the risk that the proprietary model used by the portfolio manager will not be successful in identifying investments that will help the Fund achieve its investment objective, causing the Fund to underperform other funds with a similar investment objective.

Subsidiary Risk. By investing in the Subsidiary, the Fund will be indirectly exposed to the risks associated with the Subsidiary’s investments. The Subsidiary is not registered under the 1940 Act and, unless otherwise noted, is not itself subject to all of the investor protections of the 1940 Act. Changes in the laws of the United States, the U.S. states or the Cayman Islands, under which the Fund and Subsidiary are organized and operated, as applicable, could prevent the Fund or the Subsidiary from operating as described in this Prospectus and could negatively affect the Fund and its shareholders.

Non-Diversification Risk. The Fund is classified as “non-diversified,” which means the Fund may invest a larger percentage of its assets in the securities of a smaller number of issuers than a diversified fund. Investment in securities of a limited number of issuers exposes the Fund to greater market risk and potential losses than if its assets were diversified among the securities of a greater number of issuers.

Portfolio Turnover Risk. Active and frequent trading of the Fund’s portfolio securities may lead to higher transaction costs and may result in a greater number of taxable transactions than would otherwise be the case, which could negatively affect the Fund’s performance. A high rate of portfolio turnover is 100% or more.

Tax Risk. To qualify for the tax treatment available to regulated investment companies under the Internal Revenue Code of 1986, as amended, the Fund must derive at least 90% of its gross income for each taxable year from sources treated as “qualifying income.” Income derived from direct investments in commodities or certain crypto assets is not “qualifying income.” In addition, the Internal Revenue Service (the “IRS”) has issued a revenue ruling concluding that income and gains from certain commodity-linked derivatives

does not constitute “qualifying income.” Investment through the Subsidiary is expected to allow the Fund to gain exposure to the commodity markets and crypto assets within the limitations of the federal tax law requirements applicable to regulated investment companies. The tax treatment of the Fund’s investment in commodity interests or in the Subsidiary could nevertheless be adversely affected by future legislation or Treasury regulations.

Investment through the Subsidiary may affect the timing and character of income and gain recognized by the Fund, and of distributions to shareholders. For example, the tax treatment of any gains/losses from trading in 1256 futures contracts, such as exchange-traded commodity futures contracts, are generally taxed 60% as long-term capital gains/losses and 40% short-term capital gains/losses. However, because the Subsidiary is a “controlled foreign corporation” for U.S. federal income tax purposes, any income or gain recognized in respect of its investments in 1256 futures contracts will be passed through to the Fund as ordinary income, and distributions attributable to such income and gains will generally be taxable to shareholders as ordinary income.

Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The prices of, and income generated by, securities held by the Fund may decline in response to various factors directly related to the issuers of such securities, including reduced demand for an issuer’s goods or services, poor management performance, major litigation, investigations or other controversies related to the issuer, changes in the issuer’s financial condition or credit rating, changes in government regulation affecting the issuer or its competitive environment, and strategic initiatives such as mergers, acquisitions or dispositions and the market response to any such initiatives. An individual security may also be affected by factors related to the industry or sector of the issuer or the securities markets as a whole, and conversely an industry or sector or the securities markets may be affected by a change in financial condition or another event affecting a single issuer. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole. At times, the Fund may invest more significantly in a single issuer, which could increase the Fund’s volatility and the risk of loss arising from the factors described above.

Government-Sponsored Entities Risk. The Fund’s investment in U.S. government obligations may include securities issued or guaranteed as to principal and interest by the U.S. government, or its agencies or instrumentalities. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) when it is not obligated to do so.

Recent Market Events. Periods of market volatility may occur in response to market events, public health emergencies, natural disasters or climate events, and other economic, political, and global macro factors. U.S. and international markets have recently experienced, and may continue to experience, periods of significant volatility due to various factors, including uncertainty regarding inflation and central banks’ interest rate changes, the possibility of a national or global recession, trade tensions and tariffs, and political and geopolitical events. In addition, wars or threats of war and aggression, such as Russia’s invasion of Ukraine and conflicts among nations and militant groups in the Middle East, have led, and in the future may lead, to increased short-term market volatility and may have may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments. Additionally, since the change in the U.S. presidential administration in 2025, the administration has pursued an aggressive foreign policy agenda, including actual or potential imposition of tariffs, which may have consequences on the United States’ relations with foreign countries, the economy, and markets generally. These and other similar events could be prolonged and could adversely affect the value and liquidity of the Fund’s investments, impair the Fund’s ability to satisfy redemption requests, and negatively impact the Fund’s performance.

Cybersecurity Risk. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause the Fund, the Advisor and/or other service providers (including custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality. In an extreme case, a shareholder’s ability to exchange or redeem Fund shares may be affected. The use of artificial intelligence and machine learning could exacerbate these risks. Issuers of securities in which the Fund invests are also subject to cybersecurity risks, and the value of those securities could decline if the issuers experience cybersecurity incidents.

Performance

The bar chart and table below provide some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year for Class A Shares and by showing how the average annual total returns of each class of the Fund compare with the average annual total returns of the Bloomberg US Aggregate Bond Index, a broad-based securities market index, and the ICE BofA US 3-Month Treasury Bill Index. Performance for classes other than those shown may vary from the performance shown to the extent the expenses for those classes differ. Effective February 28, 2026, the Fund changed its principal investment strategies to add exposure to certain crypto assets. Consequently, performance during periods prior to February 28, 2026, does not reflect the Fund's current investment strategies, and the Fund's performance may have differed if the Fund's current investment strategies had been in place. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at the Fund's website <https://www.mast-funds.com/>, or by calling the Fund at 1-833-829-0010.

Calendar-Year Total Return (before taxes) for the Fund – Class A Shares

For each calendar year at NAV

Highest Calendar Quarter Return at NAV	4.69%	Quarter Ended 03/31/2021
Lowest Calendar Quarter Return at NAV	(3.82)%	Quarter Ended 12/31/2018

Average Annual Total Returns (for periods ended December 31, 2025)			
	One Year	Five Years	Ten Years
Class A – Return Before Taxes	(4.57)%	2.56%	2.40%
Class A – Return After Taxes on Distributions*	(4.81)%	0.89%	0.55%
Class A – Return After Taxes on Distributions and Sale of Fund Shares*	(2.53)%	1.29%	1.05%
Class I – Return Before Taxes	0.97%	3.92%	3.22%
Bloomberg US Aggregate Bond Index (reflects no deduction for fees, expenses or taxes)	7.30%	(0.36)%	2.01%
ICE BofA US 3-Month Treasury Bill Index (reflects no deduction for fees, expenses or taxes)	4.21%	3.19%	2.19%

* After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor

Manteio Scalable Technologies LLC (“Mast Investments” or the “Advisor”) serves as investment advisor to the Fund.

Portfolio Manager

Yung-Shin Kung, Portfolio Manager of the Advisor, is the Lead Portfolio Manager of the Fund. Mr. Kung has been primarily responsible for the day-to-day management of the Fund’s portfolio since November 2015.

Purchase and Sale of Fund Shares

To purchase shares of the Fund, you must invest at least the minimum amount.

	To Open Your Account	To Add to Your Account by Check	To Add to Your Account by Exchange	To Add to Your Account by Wire
Minimum Investments				
Class A Shares				
Direct Regular Accounts	\$100	\$100	\$250	\$500

Fund shares are redeemable on any business day the New York Stock Exchange (the “NYSE”) is open for business, by written request, by telephone at 1-833-829-0010, or through your broker. Redemptions will be paid by automated clearing house funds (“ACH”), check or wire transfer. The Fund or the Advisor may waive any of the minimum initial and subsequent investment amounts.

Tax Information

The Fund’s distributions are generally taxable, and will ordinarily be taxed as ordinary income, qualified dividend income or capital gains, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. Shareholders investing through such tax-advantaged arrangements may be taxed later upon withdrawal of monies from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

MORE ABOUT THE FUNDS' INVESTMENT OBJECTIVES, PRINCIPAL INVESTMENT STRATEGIES AND RISKS

Mast Managed Futures Strategy Fund

Investment Objective

The Fund seeks positive absolute returns that have a low correlation to the returns of broad stock and bond markets. There is no assurance that the Fund will achieve its investment objective. The Fund's investment objective is not fundamental, and may be changed by the Board of Trustees without shareholder approval, upon at least 60 days' prior written notice to shareholders. The Fund's investment strategies and policies may be changed from time to time without shareholder approval or prior written notice, unless specifically stated otherwise in this Prospectus or the Statement of Additional Information ("SAI").

Principal Investment Strategies

The Fund seeks diverse exposure to macro trading opportunities such as significant price trends, both up and down, across asset classes, geographies and time horizons. The Fund may take long and/or short positions in asset classes, and the Advisor dynamically adjusts its exposure to individual asset classes utilizing trend-following and macro trading approaches. As a component of its overall investment process, the Advisor may utilize certain quantitative models and methodologies to guide its investment approach or security selection although the use of such models and methodologies may vary based on market factors and economic trends, as determined by the Advisor.

The Fund seeks to achieve its investment objective by investing directly and/or indirectly through its wholly-owned Subsidiary organized under the laws of the Cayman Islands in securities and derivative instruments including, but not limited to, equity index futures and options, swaps on equity index futures, equity swaps, interest rate futures and options, fixed income futures and options, swaps on fixed income futures, commodity and commodity index-linked futures and options, swaps on commodity and commodity index-linked futures, currency futures and options, swaps on currency futures, currency forwards and equity-, fixed income-, and commodity-notes. When used in this Prospectus, the term "Fund" includes the Subsidiary and the term "invest" includes investments the Fund makes directly and through the Subsidiary. There are no geographic limits on the Fund's holdings and the Fund will have exposure to U.S. and non-U.S. securities and currencies.

In addition, the Fund may have exposure to issuers of any size and credit quality. The Fund also invests a significant portion of its assets in investment grade money market instruments, which may include, but are not limited to, U.S. government securities, U.S. government agency securities, short-term fixed income securities, repurchase agreements, money market mutual fund shares, and cash and cash equivalents. The Fund's money market instrument holdings may serve as collateral for the Fund's derivative positions and may also earn income for the fund. The Fund's return is expected to be derived principally from changes in the value of securities and its portfolio is expected to consist principally of securities.

The Fund's use of futures, forwards, swaps and certain other financial instruments will have the economic effect of financial leverage. Financial leverage magnifies the exposure to the swings in prices of an asset class underlying a financial instrument and results in increased volatility, which means that the Fund has the potential for greater gains and losses than if the Fund did not use financial instruments with leverage. A decline in the Fund's assets due to losses magnified by the financial instruments providing leveraged exposure may require the Fund to liquidate portfolio positions when it may not be advantageous to do so in order to satisfy its obligations, to meet redemption requests or to meet the applicable requirements of the 1940 Act, and the rules thereunder.

The Fund will enter into short positions, and it may use futures and swaps or sell a security short to do so. For example, the Fund may enter into a futures contract pursuant to which it agrees to sell an asset (that it does not currently own) at a specified price at a specified point in the future. This gives the Fund a short position with respect to the asset. At times, the Fund may have significant short positions.

The Fund intends to make investments through the Subsidiary and may invest up to 25% of its total assets in the Subsidiary. The Fund will invest in the Subsidiary primarily to gain exposure to the commodities markets and crypto assets within the limitations of the U.S. federal tax laws, rules and regulations that apply to regulated investment companies. Generally, the Subsidiary will invest in long and short commodity-linked futures and swaps, but it may also invest in other types of futures, swaps and options, as well as certain money market instruments, including U.S. government securities, money market fund shares, repurchase agreements and other high-quality, short-term fixed income instruments. The primary purpose of the money market instruments held by the Subsidiary will be to serve as collateral for the Subsidiary's derivative positions; however, these instruments may also earn income for the Subsidiary. In addition, the Subsidiary may also invest in Crypto Asset ETPs and Crypto Asset Futures. Crypto assets (also referred to as "cryptocurrencies", "virtual currencies", and "digital currencies") are digital assets that are designed to act as a medium of exchange. Crypto assets are not issued by a government, bank, or central organization, and they exist via online, peer-to-peer computer networks that host public transaction ledgers where transfers are recorded on a blockchain. The Fund, through the Subsidiary, may have exposure to crypto assets equal to up to 10% of the Fund's net assets. The Subsidiary is managed by the Advisor and has the same objective as the Fund.

The Fund is actively managed by the Advisor based on the Advisor's view of the prevailing trends in the market. The percentage of the Fund's portfolio exposed to an asset class and to particular strategy will vary from time to time.

For defensive purposes, due to abnormal market conditions or economic situations as determined by the Advisor, the Fund may invest up to 100% of its total assets in cash or certain short-term securities. Although intended to avoid losses in adverse market, economic, political or other conditions, defensive tactics might be inconsistent with the Fund's principal investment strategies and might prevent the Fund from achieving its goal.

The Fund is "non-diversified," meaning that a relatively high percentage of its assets may be invested in a limited number of issuers of securities.

Mast Multialternative Strategy Fund

Investment Objective

The Fund seeks positive absolute returns. There is no assurance that the Fund will achieve its investment objective. The Fund's investment objective is not fundamental, and may be changed by the Board of Trustees without shareholder approval, upon at least 60 days' prior written notice to shareholders. The Fund's investment strategies and policies may be changed from time to time without shareholder approval or prior written notice, unless specifically stated otherwise in this Prospectus or the SAI.

Principal Investment Strategies

The Fund seeks to achieve its investment objective by utilizing a macro-aware investment process to allocate capital across a range of investment strategies. The Fund may invest in a broad range of instruments, including equities, ADRs and GDRs, other mutual funds, ETFs, including mutual funds and ETFs managed by the Advisor, warrants, bonds (both investment grade and below investment grade (commonly referred to as "high yield securities" or "junk bonds")), currencies, commodities, futures, exchange-traded and over-the-counter put and call options (both covered and uncovered) and total return and excess return swaps. The Fund may invest in such instruments directly, indirectly through fund of funds arrangements, or, in the case of commodities and certain commodity-linked instruments, indirectly, by investing in its Subsidiary which invests in such commodities and commodity-linked instruments. When used in this Prospectus, the term "Fund" includes the Subsidiary and the term "invest" includes investments the Fund makes directly, through the Subsidiary, and through acquired funds. The Fund also may invest in cash and cash equivalents. As a result of the Fund's use of derivatives, the Fund may hold significant amounts of high-quality, short-term securities, including U.S. Treasuries, shares of money market funds and repurchase agreements. The Fund may also invest in high-yield securities to earn income, as well as to achieve its investment objective. The Fund may invest in bonds of any maturity and duration. The Fund may invest globally (including in emerging markets) and there are no geographic limits on the Fund's holdings.

The Advisor primarily, but not exclusively, allocates the Fund's assets to strategies which take directional positions (*i.e.*, positions that depend upon an up or down price move in an instrument or market for success) and/or relative value positions (*i.e.*, positions that depend on price relationships between various instruments or markets and seek to profit from pricing inefficiencies) through long and/or short exposures in instruments across all major asset classes. The instruments in which the Fund may invest may be U.S. dollar or non-U.S. dollar denominated. The Fund may have exposure to issuers of any size and credit quality. The percentage of the Fund's portfolio exposed to an asset class and geographic region will vary from time to time. The Fund intends to engage in active and frequent trading.

The Advisor utilizes a process-driven approach that blends its proprietary quantitative techniques with disciplined oversight in an effort to deliver positive absolute returns. The Advisor's investment process begins with statistical research and fundamental analysis of various investment strategies spanning all major public markets. The Advisor applies its proprietary quantitative models to arrive at a subset of liquid investment strategies that the Advisor believes are suitable for the Fund. These investment strategies include, among others, those that are Fundamental, which focus on price and relative price determinants such as measures of carry (*i.e.*, the yield differences between one instrument and another) and appraisal of fair value, and Tactical, which focus on market structure and the behavior of market agents including lead-lag effects (*i.e.*, time dependent correlation relationships), liquidity provisioning and buffering, and positioning dynamics (*i.e.*, exposure patterns or sensitivities). The Advisor also employs macroeconomic and probabilistic modeling to guide its allocation decisions and select investments that the Advisor believes will promote the maintenance of a balanced and efficient Fund risk profile by explicitly considering how the evolution of markets and the behavior of market participants impact the performance and interaction of strategies.

The Fund may sell call options pursuant to which the purchaser pays the Fund a premium in exchange for the right to purchase the security underlying the option at a specified price (the "strike price") within a specified time period or at a specified future date. The call options the Fund sells may either be covered (*i.e.*, where the Fund holds the underlying security) or uncovered (*i.e.*, where the Fund does not hold the underlying security). The seller of an uncovered call option assumes the risk of a theoretically unlimited increase in the market price of the underlying security above the strike price of the option, and thus the seller's potential for loss is unlimited.

The Fund will primarily gain exposure to commodities and commodity-linked instruments through investments in the Subsidiary. The Subsidiary will invest in (long and short) commodity-linked futures and swaps, as well as certain money market instruments, including U.S. government securities, money market fund shares, repurchase agreements and other high-quality, short-term fixed income instruments. The primary purpose of the money market instruments held by the Subsidiary will be to serve as collateral for the Subsidiary's derivative positions; however, these instruments may also earn income for the Subsidiary. In addition, the Subsidiary may also invest in Crypto Asset ETPs and Crypto Asset Futures. Crypto assets (also referred to as "cryptocurrencies", "virtual currencies", and "digital currencies") are digital assets that are designed to act as a medium of exchange. Crypto assets are not issued by a government, bank, or central organization, and they exist via online, peer-to-peer computer networks that host public transaction ledgers where transfers are recorded on a blockchain. The Fund, through the Subsidiary, may have exposure to crypto assets equal to up to 10% of the Fund's net assets. The Subsidiary is managed by the Advisor and has the same investment objective as the Fund. The Fund may invest up to 25% of its total assets in the Subsidiary. Investment in the Subsidiary is expected to provide the Fund with commodity and crypto asset exposure within the limitations of the U.S. federal tax requirements that apply to regulated investment companies. Investments in other funds managed by the Advisor may provide the Fund with exposure to other securities and financial instruments in addition to commodities and commodity-linked instruments.

For defensive purposes, due to abnormal market conditions or economic situations as determined by the Advisor, the Fund may invest up to 100% of its total assets in cash or certain short-term securities. Although intended to avoid losses in adverse market, economic, political or other conditions, defensive tactics might be inconsistent with the Fund's principal investment strategies and might prevent the Fund from achieving its investment objective.

The Fund is "non-diversified," meaning that a relatively high percentage of its assets may be invested in a limited number of issuers of securities.

Principal Risks of Investing in the Funds

The principal risks described below reflect the aggregate operations of each Fund and its respective Subsidiary.

Market Risk (Both Funds). The market price of a security or instrument may decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic, political, or geopolitical conditions throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. The market value of a security or instrument also may decline because of factors that affect a particular industry or industries, such as tariffs, labor shortages or increased production costs and competitive conditions within an industry.

In addition, local, regional or global events such as war, acts of terrorism, international conflicts, trade disputes, supply chain disruptions, cybersecurity events, the spread of infectious illness or other public health issues, natural disasters or climate events, or other events could have a significant impact on a security or instrument. Such events could make identifying investment risks and opportunities especially difficult for the Advisor. In response to certain crises, the United States and other governments have taken steps to support financial markets. The withdrawal of this support or failure of efforts in response to a crisis could negatively affect financial markets generally as well as the value and liquidity of certain securities. In addition, policy and legislative changes in the United States and in other countries are changing many aspects of financial regulation. The impact of these changes on the markets, and the practical implications for market participants, may not be fully known for some time. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market.

Derivatives Risk (Both Funds). Derivatives include instruments and contracts that are based on and valued in relation to one or more underlying securities, financial benchmarks, indices, or other reference obligations or measures of value. Major types of derivatives include futures, options, swaps and forward contracts. Depending on how a Fund uses derivatives and the relationship between the market value of the derivative and the underlying instrument, the use of derivatives could increase or decrease the Fund's exposure to the risks of the underlying instrument. Using derivatives exposes a Fund to additional or heightened risks, including leverage risk, liquidity risk, valuation risk, market risk, counterparty risk, and credit risk. A small investment in derivatives could have a potentially large impact on a Fund's performance. Derivatives transactions can be highly illiquid and difficult to unwind or value, they can increase Fund volatility, and changes in the value of a derivative held by a Fund may not correlate with the value of the underlying instrument or the Fund's other investments. Many of the risks applicable to trading the instruments underlying derivatives are also applicable to derivatives trading. However, derivatives are subject to additional risks such as operational risk (such as documentation issues and settlement issues) and legal risk (such as insufficient documentation, insufficient capacity or authority of a counterparty, and issues with the legality or enforceability of a contract). For derivatives that are required to be cleared by a regulated clearinghouse, other risks may arise from a Fund's relationship with a brokerage firm through which it submits derivatives trades for clearing, including in some cases from other clearing customers of the brokerage firm. The Funds would also be exposed to counterparty risk with respect to the clearinghouse. Financial reform laws have changed many aspects of financial regulation applicable to derivatives. Once implemented, new regulations, including margin, clearing, and trade execution requirements, may make investment in derivatives more costly, may limit their availability, may present different risks or may otherwise adversely affect the value or performance of these instruments. The extent and impact of these regulations are not yet fully known and may not be known for some time.

Rule 18f-4 under the 1940 Act (the "Derivatives Rule") provides a comprehensive regulatory framework for the use of derivatives by registered investment companies, such as the Funds, and sets an outer limit on leverage based on value-at-risk (or "VaR"). The effect of the Derivatives Rule could, among other things, make investment in derivatives more costly, limit the availability or reduce the liquidity of derivatives, or otherwise adversely affect the value or performance of derivatives. Any such adverse future developments could impair the effectiveness or raise the costs of the Funds' derivative transactions, impede the employment of the Funds' derivatives strategies, or adversely affect the Funds' performance.

Futures Risk (Both Funds). The value of a futures contract tends to increase and decrease in correlation with the value of the underlying instrument. Risks of futures contracts may arise from an imperfect correlation between movements in the price of the futures and the price of the underlying instrument. A Fund's use of futures contracts (and related options) exposes the Fund to leverage risk because of the small margin requirements relative to the value of the futures contract. A relatively small market movement will have a proportionately larger impact on the funds that the Fund has deposited or will have to deposit with a broker to maintain its futures positions. Leverage can lead to large losses as well as gains. While futures contracts are generally liquid instruments, under certain market conditions they may become illiquid. Futures exchanges may impose daily or intraday price change limits and/or limit the volume of trading. Additionally, government regulation may further reduce liquidity through similar trading restrictions. As a result, a Fund may be unable to close out its futures contracts at a time that is advantageous. The price of futures can be highly volatile; using them could lower total return, and the potential loss from futures could exceed the Fund's initial investment in such contracts.

Swaps Risk (Both Funds). A swap is a two-party contract that generally obligates the parties to exchange payments based upon a specified reference security, index or index component. Swaps can involve greater risks than direct investment in securities or other similar instruments, because swaps may be leveraged and are subject to counterparty risk (e.g., the risk that the other party to the transaction defaults on its obligations), credit risk and valuation risk (i.e., swaps may be difficult to value). Swaps may also be considered illiquid. It may not be possible for a Fund to liquidate a swap position at an advantageous time or price, which may result in significant losses.

Options Risk (Both Funds). If a put or call option purchased by a Fund expires without being sold or exercised, the Fund would lose the premium it paid for the option. The risk involved in writing a covered call option is the lack of liquidity for the option. If a Fund is not able to close out the option transaction, the Fund would not be able to sell the underlying security until the option expires or is exercised. The risk involved in writing an uncovered call option is that there could be an increase in the market value of the underlying security caused by declining interest rates or other factors. If this occurs, the option could be exercised and the underlying security would then be sold by the Fund at a lower price than its current market value. The risk involved in writing a put option is that the market value of the underlying security could decrease as a result of rising interest rates or other factors. If this occurs, the option could be exercised and the underlying security would then be sold to the Fund at a higher price than its prevailing market value. Purchasing and writing put and call options are highly specialized activities and entail greater than ordinary investment risks. To the extent that a Fund invests in over-the-counter options, the Fund may be exposed to credit risk with regard to parties with which it trades and may also bear the risk of settlement default. These risks may differ materially from those entailed in exchange-traded transactions, which generally are backed by clearing organization guarantees, daily marking-to-market and settlement, and segregation and minimum capital requirements applicable to intermediaries. Transactions entered directly between two counterparties generally do not benefit from such protections and expose the parties to the risk of counterparty default.

Forwards Risk (Both Funds). The Funds may enter into forward contracts that are not traded on exchanges and may not be regulated. There are no limitations on daily price moves of forward contracts. Banks and other dealers with which the Fund maintains accounts may require that the Fund deposit margin with respect to such trading. The Funds' counterparties are not required to continue making markets in such contracts. There have been periods during which certain counterparties have refused to continue to quote prices for forward contracts or have quoted prices with an unusually wide spread (the difference between the price at which the counterparty is prepared to buy and that at which it is prepared to sell). Arrangements to trade forward contracts may be made with only one or a few counterparties, and liquidity problems therefore might be greater than if such arrangements were made with numerous counterparties. The imposition of credit controls by governmental authorities might limit such forward trading to less than the amount that the Advisor would otherwise recommend, to the possible detriment of the Fund.

Speculative Exposure Risk (Both Funds). Gains or losses from speculative positions in a derivative may be much greater than the derivative's original cost. For example, potential losses from swaps and speculative short sales are unlimited.

Commodity Exposure Risk (Both Funds). The Funds' and the Subsidiaries' investments in commodity-linked derivative instruments may subject the Funds to greater volatility than investments in traditional securities, particularly if the investments involve leverage. The value of commodity-linked derivatives instruments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or sectors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and international economic, political and regulatory developments. Use of leveraged commodity-linked derivatives creates an opportunity for increased return but, at the same time, creates the possibility for greater loss (including the likelihood of greater volatility of the Funds' NAV), and there can be no assurance that the Funds' use of leverage will be successful.

Equity Risk (Mast Managed Futures Strategy Fund). The Fund may obtain exposure to equity securities. The value of equity securities may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or factors relating to specific companies in which the Fund invests. The price of common stock of an issuer in a Fund's portfolio may decline if the issuer fails to make anticipated dividend payments because, among other reasons, the financial condition of the issuer declines. Common stock is subordinated to preferred stocks, bonds and other debt instruments in a company's capital structure in terms of priority with respect to corporate income, and therefore will be subject to greater dividend risk than preferred stocks or debt instruments of such issuers. In addition, while broad market measures of common stocks have historically generated higher average returns than fixed income securities, common stocks have also experienced significantly more volatility in those returns.

Equity Risk (Mast Multialternative Strategy Fund). The value of equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Funds participate, or factors relating to specific companies in which the Fund invests. The price of common stock of an issuer in the Fund's portfolio may decline if the issuer fails to make anticipated dividend payments because, among other reasons, the financial condition of the issuer declines. Common stock is subordinated to preferred stocks, bonds and other debt instruments in a company's capital structure in terms of priority with respect to corporate income, and therefore will be subject to greater dividend risk than preferred stocks or debt instruments of such issuers. In addition, while broad market measures of common stocks have historically generated higher average returns than fixed income securities, common stocks have also experienced significantly more volatility in those returns.

Small-Cap and Mid-Cap Company Risk (Mast Multialternative Strategy Fund). Investing in small-capitalization and mid-capitalization companies generally involves greater risks than investing in large-capitalization companies. Small- or mid-cap companies may have limited product lines, markets or financial resources or may depend on the expertise of a few people and may be subject to more abrupt or erratic market movements than securities of larger, more established companies or market averages in general. Many small capitalization companies may be in the early stages of development. Since equity securities of smaller companies may lack sufficient market liquidity and may not be regularly traded, it may be difficult or impossible to sell securities at an advantageous time or a desirable price.

Fixed Income Securities Risk (Both Funds). The prices of fixed income securities respond to economic developments, particularly interest rate changes, as well as to changes in an issuer's credit rating or market perceptions about the creditworthiness of an issuer. Prices of fixed income securities tend to move inversely with changes in interest rates. Generally, fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, with lower rated securities more volatile than higher rated securities. The longer the effective maturity and duration of a Fund's portfolio, the more the Fund's share price is likely to react to changes in interest rates. (Duration is a weighted measure of the length of time required to receive the present value of future payments, both interest and principal, from a fixed income security.) Some fixed income securities give the issuer the option to call, or redeem, the securities before their maturity dates. If an issuer calls its security during a time of declining interest rates, a Fund might have to reinvest the proceeds in an investment offering a lower yield, and therefore might not benefit from any increase in value of the security as a result of declining interest

rates. During periods of market illiquidity or rising interest rates, prices of callable issues are subject to increased price fluctuation. In addition, a Fund may be subject to extension risk, which occurs during a rising interest rate environment because certain obligations may be paid off by an issuer more slowly than anticipated, causing the value of those securities held by the Fund to fall.

High Yield (“Junk”) Bond Risk (Mast Multialternative Strategy Fund). High yield bonds (often called “junk bonds”) are speculative, involve greater risks of default or downgrade and are more volatile and tend to be less liquid than investment-grade securities. High yield bonds involve a greater risk of price declines than investment-grade securities due to actual or perceived changes in an issuer’s creditworthiness. Companies issuing high yield fixed-income securities are less financially strong, are more likely to encounter financial difficulties, and are more vulnerable to adverse market events and negative sentiments than companies with higher credit ratings. These factors could affect such companies’ abilities to make interest and principal payments and ultimately could cause such companies to stop making interest and/or principal payments. In such cases, payments on the securities may never resume, which would result in the securities owned by the Fund becoming worthless. The market prices of junk bonds are generally less sensitive to interest rate changes than higher rated investments, but more sensitive to adverse economic or political changes or individual developments specific to the issuer.

Foreign Investment Risk (Both Funds). Investments in foreign securities are affected by risk factors generally not thought to be present in the United States. The prices of foreign securities may be more volatile than the prices of securities of U.S. issuers because of economic and social conditions abroad, political developments, and changes in the regulatory environments of foreign countries. Special risks associated with investments in foreign markets include less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, less government supervision of exchanges, brokers and issuers, greater risks associated with counterparties and settlement, and difficulty in enforcing contractual obligations. Changes in exchange rates and interest rates, and the imposition of foreign taxes, sanctions, confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and/or other governments may adversely affect the values of a Fund’s foreign investments. Foreign companies are generally subject to different legal and accounting standards than U.S. companies, and foreign financial intermediaries may be subject to less supervision and regulation than U.S. financial firms. The Funds’ investments in depositary receipts (including ADRs) are subject to these risks, even if denominated in U.S. dollars, because changes in currency and exchange rates affect the values of the issuers of depositary receipts. In addition, the underlying issuers of certain depositary receipts, particularly unsponsored or unregistered depositary receipts, are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities.

Emerging Markets Risk (Mast Multialternative Strategy Fund). The Fund may invest in companies organized or doing substantial business in emerging market or developing countries, as defined by the World Bank, International Finance Corporation, or included in any of the Morgan Stanley Capital International (MSCI) emerging market or other comparable indices. Many of the risks with respect to foreign investments are more pronounced for investments in issuers in developing or emerging market countries. Emerging market countries tend to have more government exchange controls, more volatile interest and currency exchange rates, less market regulation, and less developed and less stable economic, political and legal systems than those of more developed countries. There may be less publicly available and reliable information about issuers in emerging markets than is available about issuers in more developed capital markets, and such issuers may not be subject to regulatory, accounting, auditing, and financial reporting and recordkeeping standards comparable to those to which U.S. companies are subject. The Public Company Accounting Oversight Board (“PCAOB”), which regulates auditors of U.S. public companies, for example, may be unable to inspect audit work and practices in certain countries. If the PCAOB is unable to oversee the operations of accounting firms in such countries, inaccurate or incomplete financial records of an issuer’s operations may not be detected, which could negatively impact the Fund’s investment in such company. In addition, emerging market countries may experience high levels of inflation and may have less liquid securities markets and less efficient trading and settlement systems. Their economies also depend heavily upon international trade and may be adversely affected by protective trade barriers and the economic conditions of their trading partners. Emerging market countries may have fixed or managed currencies that are not free-floating against the U.S. dollar and may not be traded internationally. Some countries with emerging securities markets have experienced high rates of inflation for many years. Inflation and rapid fluctuations in inflation rates have had and may continue

to have negative effects on the economies and securities markets of certain countries. Emerging markets typically have substantially less volume than U.S. markets, securities in these markets are less liquid, and their prices often are more volatile than those of comparable U.S. companies. Securities markets in emerging markets may also be susceptible to manipulation or other fraudulent trade practices, which could disrupt the functioning of these markets or adversely affect the value of investments traded in these markets, including investments of the Fund. The Fund's rights with respect to its investments in emerging markets, if any, will generally be governed by local law, which may make it difficult or impossible for the Fund to pursue legal remedies or to obtain and enforce judgments in local courts. Delays may occur in settling securities transactions in emerging market countries, which could adversely affect the Fund's ability to make or liquidate investments in those markets in a timely fashion. In addition, it may not be possible for the Fund to find satisfactory custodial services in an emerging market country, which could increase the Fund's costs and cause delays in the transportation and custody of its investments. There may also be restrictions on imports from certain countries, such as Russia, and dealings and transactions with certain Russian companies, officials, individuals, and state-sponsored entities. Further, there may be restrictions on investments in companies domiciled in certain countries, such as China and Russia. Such restrictions can change from time to time, and as a result of forced selling or an inability to participate in an investment the Advisor otherwise believes is attractive, the Fund may incur losses. Any of these factors may adversely affect the Fund's performance or the Fund's ability to pursue its investment objective.

Repurchase Agreement Risk (Both Funds). Each Fund may enter into repurchase agreements, which are transactions in which the Fund purchases securities or other obligations from a bank or securities dealer and simultaneously commits to resell them to a counterparty at an agreed-upon date or upon demand and at a price reflecting a market rate of interest unrelated to the coupon rate or maturity of the purchased obligations. A Fund's investment in repurchase agreements may be subject to market and credit risk with respect to the collateral securing the repurchase agreements. If the market value of the underlying obligations of a repurchase agreement declines, the counterparty must provide additional collateral so that at all times the value of the collateral is greater than the repurchase price of the underlying obligations. Nonetheless, should a counterparty become insolvent or otherwise default, there could be a delay before a Fund is able to liquidate the collateral, which would subject the collateral and the Fund to market risk during that period. If a Fund's counterparty should default on its obligations and the Fund is delayed or prevented from recovering the collateral, or if the value of the collateral is insufficient, the Fund may realize a loss.

Counterparty Risk (Both Funds). The Fund will be exposed to the credit of the counterparties to OTC derivative contracts and repurchase agreements and their ability to satisfy the terms of the agreements, which exposes the Fund to the risk that the counterparties may default on their obligations to perform under the agreements. In the event of a bankruptcy or insolvency of a counterparty, a Fund could experience delays in liquidating the positions and significant losses, including declines in the value of its investment during the period in which the Fund seeks to enforce its rights, inability to realize any gains on its investment during such period, loss of collateral and fees and expenses incurred in enforcing its rights.

Credit Risk (Both Funds). If an obligor (such as the issuer itself or a party offering credit enhancement) for a security held by the Fund fails to pay amounts due when required by the terms of the security, otherwise defaults, is perceived to be less creditworthy, becomes insolvent or files for bankruptcy, a security's credit rating is downgraded or the credit quality or value of any underlying assets declines, the value of the Fund's investment could decline. If a Fund enters into financial contracts (such as certain derivatives, repurchase agreements, reverse repurchase agreements, and when-issued, delayed delivery and forward commitment transactions), the Fund will be subject to the credit risk presented by the counterparties.

Interest Rate Risk (Both Funds). Prices of fixed income securities tend to move inversely with changes in interest rates. Generally fixed income securities decrease in value if interest rates rise and increase in value if interest rates fall, with longer-term securities being more sensitive than shorter-term securities. For example, the price of a security with a three-year duration would be expected to drop by approximately 3% in response to a 1% increase in interest rates. Duration is a weighted measure of the length of time required to receive the present value of future payments, both interest and principal, from a fixed income security. Generally, the longer the maturity and duration of a bond or fixed rate loan, the more sensitive it is to this risk. Falling interest rates also create the potential for a decline

in a Fund's income. Changes in governmental policy, rising inflation rates, and general economic developments, among other factors, could cause interest rates to increase and could have a substantial and immediate effect on the values of a Fund's investments. These risks are greater during periods of rising inflation. In addition, a potential rise in interest rates may result in periods of volatility and increased redemptions that might require a Fund to liquidate portfolio securities at disadvantageous prices and times.

Leveraging Risk (Both Funds). The use of leverage, such as entering into futures contracts, options, and short sales, may magnify a Fund's gains or losses. Because many derivatives have a leverage component, adverse changes in the value or level of the underlying instrument can result in a loss substantially greater than the amount invested in the derivative itself. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment.

Short Sales Risk (Both Funds). In connection with a short sale of a security or other instrument, each Fund is subject to the risk that instead of declining, the price of the security or other instrument sold short will rise. If the price of the security or other instrument sold short increases between the date of the short sale and the date on which a Fund replaces the security or other instrument borrowed to make the short sale, the Fund will experience a loss, which is theoretically unlimited since there is a theoretically unlimited potential for the market price of a security or other instrument sold short to increase. Shorting options or futures may have an imperfect correlation to the assets held by a Fund and may not adequately protect against losses in or may result in greater losses for the Fund's portfolio. By investing the proceeds received from selling securities short, the Fund is employing leverage, which creates special risks. Furthermore, until the Fund replaces a security borrowed, or sold short, it must pay to the lender amounts equal to any dividends that accrue during the period of the short sale. In addition, each Fund will incur certain transaction fees associated with short selling.

Currency Risk (Both Funds). The values of investments in securities denominated in foreign currencies increase or decrease as the rates of exchange between those currencies and the U.S. dollar change. Currency conversion costs and currency fluctuations could erase investment gains or add to investment losses. Currency exchange rates can be volatile and are affected by factors such as general economic conditions, the actions of the United States and foreign governments or central banks, the imposition of currency controls, and speculation.

Lack of Correlation Risk; Hedging Risk (Both Funds). There can be no assurance that a Fund's hedges will be effective. Any decrease in negative correlation or increase in positive correlation between the positions the Advisor anticipated would be offsetting (such as short and long positions in securities or currencies held by the Fund) could result in significant losses for the Fund.

Arbitrage or Fundamental Risk (Mast Multialternative Strategy Fund). Employing arbitrage and alternative strategies has the risk that anticipated opportunities do not play out as planned, resulting in potentially reduced returns or losses to the Fund as it unwinds unsuccessful investments.

Convertible Securities Risk (Mast Multialternative Strategy Fund). Convertible securities are securities that are convertible into or exchangeable for common or preferred stock. The values of convertible securities may be affected by changes in interest rates, the creditworthiness of their issuer, and the ability of the issuer to repay principal and to make interest payments. A convertible security tends to perform more like a stock when the underlying stock price is high and more like a debt security when the underlying stock price is low. A convertible security is not as sensitive to interest rate changes as a similar non-convertible debt security and generally has less potential for gain or loss than the underlying stock.

ETF and Mutual Fund Risk (Mast Multialternative Strategy Fund). Investing in ETFs or mutual funds (including other funds managed by the Advisor) will provide the Funds with exposure to the risks of owning the underlying securities the ETFs or mutual funds hold. Shares of ETFs typically trade on securities exchanges and may at times trade at a premium or discount to their net asset values. In addition, an ETF or a mutual fund, if the mutual fund is an index fund, may not replicate exactly the performance of the benchmark index it seeks to track for a number of reasons, including transaction costs incurred by the ETF or mutual fund, the temporary

unavailability of certain index securities in the secondary market, or discrepancies between the ETF or mutual fund and the index with respect to the weighting of securities or the number of securities held. It may be more expensive for a Fund to invest in an ETF or mutual fund than to own the portfolio securities of these investment vehicles directly. Investing in ETFs and mutual funds, which are investment companies, involves duplication of advisory fees and certain other expenses. The Funds will pay brokerage commissions in connection with the purchase and sale of shares of ETFs.

Crypto Asset Risk (Both Funds). Crypto assets, such as bitcoin and ether, are digital assets that are designed to act as a medium of exchange. Despite being referred to as “currencies,” crypto assets are not widely accepted as a medium of exchange, and there is no guarantee that they will ever be accepted as such. The value of the Fund’s indirect investments in crypto assets, through Crypto Asset ETPs and Crypto Asset Futures, is subject to fluctuations in the value of the underlying crypto assets. The value of a crypto asset is determined by the supply of and demand for the crypto asset in the global market, which consists of transactions on electronic exchanges. Pricing on exchanges and other venues can be volatile and can adversely affect the value of the Fund’s exposure to the crypto asset. Currently, there is relatively limited use of crypto assets in the retail and commercial marketplace in comparison to the relatively large use of crypto assets by speculators, thus contributing to price volatility that could adversely affect the Fund’s investments. Crypto asset transactions are irrevocable, and stolen or incorrectly transferred crypto assets may be irretrievable. As a result, any incorrectly executed transactions could adversely affect the value of the Fund’s investments in Crypto Asset ETPs and Crypto Asset Futures.

Crypto assets generally operate without central authority (such as a bank) and are not backed by any government; therefore crypto assets are not subject to the same degree of regulation as are registered U.S. securities. The reporting, accounting and auditing standards for crypto assets may differ from the standards for registered U.S. securities. Due to the unregulated nature and lack of transparency surrounding the operations of crypto asset platforms, which may experience fraud, manipulation, security failures or operational problems, as well as the wider crypto asset market, the value of a crypto asset and, consequently, the value of the Fund’s investments in Crypto Asset ETPs and Crypto Asset Futures may be adversely affected.

Countries, including the United States, may restrict or outlaw the acquisition, use, or sale of one or more crypto assets in the future, and regulation in the United States is still developing. Ongoing and future regulatory actions may alter, perhaps to a materially adverse extent, the nature of investments in crypto assets generally. Depending on its characteristics, a crypto asset may be considered a “security” under the federal securities laws. The test for determining whether a particular crypto asset is a “security” is complex and difficult to apply, and the outcome is difficult to predict. A determination that a crypto asset is a “security” may adversely affect the value of the crypto asset.

The Fund will indirectly bear its proportionate share of management fees and other expenses that are charged by Crypto Asset ETPs in addition to its own direct expenses and will pay brokerage commissions in connection with the purchase and sale of shares of Crypto Asset ETPs. Like other exchange-traded products, the shares of Crypto Asset ETPs may be bought and sold in the secondary market and may trade at a premium or discount to their net asset value. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity in the secondary market, in which case such premiums or discounts may be significant and the bid-ask spread could widen. Although the shares are listed for trading on an exchange, it cannot be assumed that an active trading market for the shares will be maintained. The lack of an active trading market for the shares may result in limited market liquidity and losses when selling the shares.

In addition, Crypto Asset ETPs have a limited number of financial institutions that may act as APs and there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent that (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform such functions, shares may trade at a material discount to net asset value, the bid-ask spread could widen, and shares could face trading halts and/or delisting.

Furthermore, the inability of Crypto Asset ETPs to facilitate in-kind creations and redemptions of shares could have adverse consequences for the performance of Crypto Asset ETPs. The use of cash creations and redemptions, as opposed to in-kind creations and redemptions, may adversely affect the arbitrage transactions by APs intended to keep the price of Crypto Asset ETPs' shares closely linked to the price of the underlying crypto asset, and, as a result, the price of the shares may fall or otherwise diverge from net asset value.

Crypto Asset ETPs are not registered investment companies under the 1940 Act or commodity pools under the CEA, and therefore investors in Crypto Asset ETPs do not have the regulatory protections associated with ownership of shares in an investment company registered under the 1940 Act or the protections afforded by the CEA. Moreover, as sponsors of Crypto Asset ETPs have a limited track record in operating investment vehicles that specifically deal with crypto assets, their experience may be inadequate or they may be unable to successfully manage them. This limited experience poses several potential risks to the effective management and operation of Crypto Asset ETPs. Crypto assets, such as bitcoin and ether, are known for their high volatility, unique technical, legal and regulatory challenges, and rapidly evolving market dynamics. The sponsors' limited experience in this specific field may not fully equip them to navigate these complexities effectively.

Issuer Risk (Both Funds). Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The prices of, and income generated by, securities held by the Fund may decline in response to various factors directly related to the issuers of such securities, including reduced demand for an issuer's goods or services, poor management performance, major litigation, investigations or other controversies related to the issuer, changes in the issuer's financial condition or credit rating, changes in government regulation affecting the issuer or its competitive environment, and strategic initiatives such as mergers, acquisitions or dispositions and the market response to any such initiatives. An individual security may also be affected by factors related to the industry or sector of the issuer or the securities markets as a whole, and conversely an industry or sector or the securities markets may be affected by a change in financial condition or another event affecting a single issuer. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole. To the extent that the securities of issuers in the same or related industries or sectors behave similarly to each other, and these issuers make up a sizeable portion of the market, events affecting one issuer, industry or sector or the securities markets generally may have a larger impact. If such issuers represent a substantial portion of major market indices, a downturn in their stock prices may have a disproportionate adverse effect on the overall equity markets, even if other segments of the market perform well. At times, the Fund may invest more significantly in a single issuer, which could increase the Fund's volatility and the risk of loss arising from the factors described above.

Liquidity Risk (Both Funds). Due to a lack of demand in the marketplace or other factors, such as market turmoil, the Fund may not be able to sell some or all of the investments that it holds, or if the Fund is forced to sell an illiquid asset to meet redemption requests or other cash needs, it may only be able to sell those investments at a loss. Liquidity risk arises, for example, from small average trading volumes, trading restrictions, or temporary suspensions of trading. In addition, when the market for certain investments is illiquid, the Fund may be unable to achieve its desired level of exposure to a certain sector. Liquid investments may become illiquid or less liquid after purchase by the Fund, particularly during periods of market turmoil. Illiquid and relatively less liquid investments may be harder to value, especially in changing markets. Moreover, the reduction in dealer market-making capacity in the fixed income markets that has occurred in recent years has the potential to decrease the liquidity of the Fund's investments. Liquidity risk may be more pronounced for the Fund's investments in developing countries.

Valuation Risk (Both Funds). Many factors may influence the price at which the Fund could sell any particular portfolio investment. The sales price may well differ—higher or lower—from the Fund's last valuation, and such differences could be significant, particularly for illiquid securities and securities that trade in relatively thin markets and/or markets that experience extreme volatility. If market conditions make it difficult to value some investments, the Advisor may value these investments using more subjective methods, such as fair value methodologies. Investors who purchase or redeem Fund shares on days when the Fund is holding fair-valued securities may receive fewer

or more shares, or lower or higher redemption proceeds, than they would have received if the Advisor had not fair-valued the securities or had used a different valuation methodology. The value of foreign securities, certain fixed income securities, and currencies may be materially affected by events after the close of the market on which they are valued but before the Fund determines its net asset value.

Management and Strategy Risk (Both Funds). The value of your investment depends on the judgment of the Advisor about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incorrect. Investment strategies employed by the Advisor in selecting investments for the Funds may not result in an increase in the value of your investment or in overall performance equal to other investments. The Fund also bears the risk that the proprietary model used by the portfolio manager will not be successful in identifying investments that will help the Fund achieve its investment objective, causing the Fund to underperform other funds with a similar investment objective.

Subsidiary Risk (Both Funds). By investing in its respective Subsidiary, each Fund will be indirectly exposed to the risks associated with the Subsidiary's investments. Each Subsidiary is not registered under the 1940 Act and, unless otherwise noted in this Prospectus, is not itself subject regulation under the 1940 Act. Thus, the Fund, as an investor in its Subsidiary, will not have all of the protections offered to investors in regulated investment companies. Each Fund, however, wholly owns and controls its respective Subsidiary. Further, the Advisor acts as the investment advisor for each Subsidiary, making it unlikely that a Subsidiary would intentionally take action contrary to the interests of a Fund and its shareholders.

Changes in the laws of the United States, the U.S. states or the Cayman Islands could prevent a Subsidiary from operating as described in this Prospectus and could negatively affect the Fund and its shareholders. In addition, the Cayman Islands currently does not impose any income, corporate, capital gain or withholding taxes on the Subsidiaries. If this were to change and the Subsidiaries were required to pay Cayman Islands taxes, the investment returns of the Funds would be adversely affected.

Non-Diversification Risk (Both Funds). Each Fund is classified as "non-diversified," which means the Fund may invest a larger percentage of its assets in the securities of a smaller number of issuers than a diversified fund. Investment in securities of a limited number of issuers exposes the Funds to greater market risk and potential losses than if their assets were diversified among the securities of a greater number of issuers.

Portfolio Turnover Risk (Mast Multialternative Strategy Fund). Active and frequent trading of a Fund's portfolio securities may lead to higher transaction costs and may result in a greater number of taxable transactions than would otherwise be the case, which could negatively affect the Fund's performance. A high rate of portfolio turnover is 100% or more.

Tax Risk (Both Funds). To qualify for the tax treatment available to regulated investment companies under the Code, a Fund must derive at least 90% of its gross income for each taxable year from sources treated as "qualifying income." Income derived from direct investments in commodities or certain crypto assets is not "qualifying income." In addition, the IRS has issued a revenue ruling concluding that income and gains from certain commodity-linked derivatives does not constitute "qualifying income." Investment through the Subsidiary is expected to allow a Fund to gain exposure to the commodity markets and crypto assets within the limitations of the federal tax law requirements applicable to regulated investment companies. The tax treatment of a Fund's investment in commodity interests or in the Subsidiary could nevertheless be adversely affected by future legislation or Treasury regulations.

The tax treatment of the Fund's investment in commodity interests or in its Subsidiary could also be adversely affected by future legislation or Treasury regulations. If income derived by the Fund from its investments in commodity interests and in its Subsidiary does not constitute "qualifying income," the Fund may not be able to qualify as a regulated investment company under the Code; in that case, the Fund would be subject to U.S. federal income tax at regular corporate rates on its taxable income, including its net capital gain, even if

such income were distributed to its shareholders, and all distributions out of earnings and profits would be taxed to shareholders as dividend income. If future legislation, Treasury regulations or IRS guidance further limits the Fund's ability to treat its income from its investments in commodity interests or in the Subsidiary as "qualifying income," the Fund and the Advisor will consider what action to take, including potentially liquidating the Fund.

For U.S. federal income tax purposes, the Subsidiary will be treated as a corporation. As a result, the Subsidiary will be treated as conducting its own activities and recognizing its own income. The Subsidiary will be subject to U.S. federal income tax, at the rate applicable to U.S. corporations, on its net income, if any, that is treated as "effectively connected" with the conduct of a trade or business in the United States ("effectively connected income"). In addition, the Subsidiary will be subject to a 30% U.S. branch profits tax in respect of its "dividend equivalent amount," as defined in Section 884 of the Code, attributable to its effectively connected income. The Fund generally expects that the activity of the Subsidiary will not be treated as a U.S. trade or business, but this conclusion is not free from doubt. In this regard, applicable law provides a "safe harbor" applicable to a non-U.S. corporation (other than a dealer in securities) that engages in the U.S. in trading securities (including contracts or options to buy or sell securities) for its own account, pursuant to which such non-U.S. corporation will not be deemed to be engaged in a U.S. trade or business by reason of those transactions. The safe harbor also provides that a non-U.S. corporation (other than a dealer in commodities) that engages in the U.S. in trading commodities for its own account is not deemed to be engaged in a U.S. trade or business if the commodities are of a kind customarily dealt in on an organized commodity exchange and if the transaction is of a kind customarily consummated at such place. Pursuant to proposed regulations, a non-U.S. taxpayer (other than a dealer in stocks, securities or derivatives) that effects transactions in the U.S. in certain derivatives for its own account is not deemed to be engaged in a U.S. trade or business by reason of those transactions.

Certain crypto assets might not constitute securities, commodities or derivatives, so the Subsidiary's activities with respect to crypto assets might not fall within the safe harbor. If any of the Subsidiary's activities were determined not to be of the type described in the safe harbor, the Subsidiary may be treated as engaged in a U.S. trade or business.

In addition, depending on the structure of a particular crypto asset, the IRS may take the position that a crypto asset is equivalent to another type of asset, e.g., an equity or debt interest in an arrangement that is treated as an entity for U.S. federal income tax purposes. If a particular crypto asset is viewed as an interest in an entity treated as a partnership for U.S. federal income tax purposes and the activities surrounding that crypto asset are viewed as giving rise to a U.S. trade or business, the Subsidiary could be treated as engaged in a U.S. trade or business. Additionally, the Subsidiary's other activities with respect to crypto assets, including any mining or staking activities, may constitute a U.S. trade or business. If the Subsidiary were treated as engaged in a U.S. trade or business, the Fund's returns could be significantly reduced.

Significant aspects of the U.S. federal income tax treatment of crypto assets are uncertain. The IRS and U.S. Department of Treasury have issued only limited guidance on the taxation of crypto assets. The existing guidance does not address the U.S. federal income tax treatment of crypto assets that are not digital currency and does not address many other significant aspects of the U.S. federal income tax treatment of crypto assets. Accordingly, the manner in which the Subsidiary's investments and activities relating to crypto assets, if any, will be treated for federal income tax purposes is uncertain, and will depend upon the application of complex aspects of U.S. federal income tax law.

Government-Sponsored Entities Risk (Both Funds). A Fund's investment in U.S. government obligations may include securities issued or guaranteed as to principal and interest by the U.S. government, or its agencies or instrumentalities. Payment of principal and interest on U.S. government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) when it is not obligated to do so.

Recent Market Events (Both Funds). Periods of market volatility may occur in response to market events, public health emergencies, natural disasters or climate events, and other economic, political, and global macro factors. U.S. and international markets have recently experienced, and may continue to experience, periods of significant volatility due to various factors, including uncertainty regarding inflation and central banks' interest rate changes, the possibility of a national or global recession, trade tensions and tariffs, and political and geopolitical events. In addition, military conflicts and wars, such as Russia's invasion of Ukraine and conflicts among nations and militant groups in the Middle East, have increased tensions in Europe and the Middle East, have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments. Additionally, since the change in the U.S. presidential administration in 2025, the administration has pursued an aggressive foreign policy agenda, including through suggestions that the United States should control sovereign foreign territories, attempts to restructure federal government agencies with international influence, and the actual or potential imposition of tariffs on foreign countries, including China and long-time U.S. allies. In particular, the imposition of tariffs has led to retaliatory tariffs by certain foreign countries and could lead to retaliatory tariffs by additional foreign countries, as well as increased and prolonged market volatility, and sector-specific downturns in industries reliant on international trade. The new administration has also sought to reduce the headcount of and freeze funding available to certain U.S. government agencies. Such efforts may continue throughout U.S. federal agencies, which could increase administrative burdens on remaining government employees, increase processing times of company filings, alter regulatory policymaking, and increase regulatory volatility. These efforts may have a negative impact on the Fund or on markets generally.

In September 2024, the Federal Reserve lowered interest rates for the first time since 2020. Changing interest rate environments (whether downward or upward) impact various sectors of the economy and asset classes in different ways. For example, low interest rate environments tend to be positive for the equity markets, whereas high interest rate environments tend to apply downward pressure on earnings and equity prices.

In addition, raising the ceiling on U.S. government debt and passing periodic legislation to fund the government have become increasingly politicized. Any failure to do either could lead to a default on U.S. government obligations, with unpredictable consequences for economies and markets in the United States and elsewhere.

The events and circumstances described above could be prolonged and could adversely affect the value and liquidity of a Fund's investments, impair a Fund's ability to satisfy redemption requests, and negatively impact a Fund's performance. Other market events may cause similar disruptions and effects.

Cybersecurity Risk (Both Funds). Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause a Fund, the Advisor and/or other service providers (including custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality. A cybersecurity incident may disrupt the processing of shareholder transactions, impact a Fund's ability to calculate its net asset value, and prevent shareholders from redeeming their shares. The use of artificial intelligence and machine learning could exacerbate these risks. Issuers of securities in which a Fund invests are also subject to cybersecurity risks, and the value of those securities could decline if the issuers experience cybersecurity incidents.

Portfolio Holdings Information

A description of the Funds' policies and procedures with respect to the disclosure of the Funds' portfolio securities is available in the Funds' SAI. Currently, disclosure of the Funds' holdings is required to be made quarterly within 60 days of the end of each fiscal quarter in the Funds' Financials and Other Information, which will be included in the Funds' Form N-CSR filings, and in their monthly holdings reports on Form N-PORT.

MANAGEMENT OF THE FUNDS

Investment Advisor

Manteio Scalable Technologies LLC, a Delaware limited liability company, is the Funds' investment advisor and provides investment advisory services to the Funds pursuant to an investment advisory agreement between the Advisor and the Trust (the "Advisory Agreement"). Mast Investment's principal address is 111 Town Square Place, Suite 1203, Jersey City, New Jersey 07310. Mast Investments has no operating history and is a newly-formed investment advisor that has recently registered with the U.S. Securities and Exchange Commission (the "SEC") as an investment advisor. Mast Investments is an indirect subsidiary of Manteio Partners LLC, and is under common control with Manteio Capital LLC, which has been registered with the SEC as an investment advisor since 2021. Mast Investments is a direct wholly-owned subsidiary of Manteio Scalable Partners LLC. As of October 31, 2025, Mast Investments and its affiliates had approximately \$444 million in assets under management.

The following table illustrates the annual contractual advisory fees to the Advisor for the services and facilities it provides to the Funds, payable on a monthly basis.

Fund	Contractual Advisory Fees As a Percentage of Average Daily Net Assets
Mast Managed Futures Strategy Fund	1.04%
Mast Multialternative Strategy Fund	1.04%

In addition, the Advisor has agreed to voluntarily waive its advisory fees for the Mast Multialternative Strategy Fund by 0.19% to 0.85% until November 22, 2026. The Advisor will not seek recoupment of the voluntary advisory fees waived.

For the fiscal year ended October 31, 2025, the Advisor received the following advisory fees, after waiving fees pursuant to its expense limitation agreement with the Trust on behalf of the Fund, as follows:

Fund	Advisory Fees (Net of Fee Waivers) Received as a Percentage of Average Daily Net Assets
Mast Managed Futures Strategy Fund	\$1,010,126
Mast Multialternative Strategy Fund	\$1,302,608

A discussion regarding the basis for the Board's approval of the Advisory Agreement is available in the Funds' Form N-CSR filing for the fiscal period ending April 30, 2025.

Portfolio Manager

Yung-Shin Kung is the Lead Portfolio Manager of each Fund since November 2015. Prior to joining Mast Investments, Mr. Kung was the Head and Chief Investment Officer of UBS AM (Americas) Quantitative Investment Strategies. Since 2009, he has held various leadership positions in Credit Suisse Asset Management including Head of Portfolio Management – Americas and Global Head of Hedge Fund Research within the Alternative Funds Solutions group. Mr. Kung was a Director at Merrill Lynch in the Financial Products Group from 2006-2009, where he developed and marketed customized structured products and provided advice and guidance to hedge fund investors. Prior to his time at Merrill Lynch, Mr. Kung spent eight years at Credit Suisse First Boston in several departments including structured debt capital markets, technology investment banking, and alternative investments. Mr. Kung began his career at

Credit Suisse First Boston in 1997. He serves on the Advisory Board of the San Francisco State University Big Data Program and is a member of the University of Chicago's Leaders in Philanthropy. Mr. Kung holds a B.A. in Economics from the University of Chicago, where he was elected Phi Beta Kappa, and fulfilled the college's requirements for a B.A. in Statistics.

The Funds' SAI provides additional information about the Portfolio Manager's compensation, other accounts managed by the Portfolio Manager, and the Portfolio Manager's ownership of Fund securities.

Other Service Providers

Distribution Services, LLC, located at 190 Middle Street, Suite 301, Portland, Maine 04101, is the Trust's principal underwriter and acts as the Trust's distributor (the "Distributor") in connection with the offering of Fund shares. The Distributor may enter into agreements with banks, broker-dealers, or other financial intermediaries through which investors may purchase or redeem shares. The Distributor is not affiliated with the Trust, the Advisor or any other service provider for the Funds.

Fund Expenses

Each Fund is responsible for its own operating expenses (all of which will be borne directly or indirectly by the Fund's shareholders), including among others, legal fees and expenses of counsel to the Fund and the Fund's independent trustees; insurance (including trustees' and officers' errors and omissions insurance); auditing and accounting expenses; taxes and governmental fees; listing fees; fees and expenses of the Fund's custodians, administrators, transfer agents, registrars and other service providers; expenses for portfolio pricing services by a pricing agent, if any; expenses in connection with the issuance and offering of shares; brokerage commissions and other costs of acquiring or disposing of any portfolio holding of the Fund; and any litigation expenses.

The Advisor has contractually agreed to waive its fees and/or pay for operating expenses of each Fund to ensure that the total annual fund operating expenses (excluding, as applicable, taxes, leverage interest, brokerage commissions, dividend and interest expenses on short sales, acquired fund fees and expenses (as determined in accordance with Form N-1A), professional fees related to services for the collection of foreign tax reclaims, expenses incurred in connection with any merger or reorganization, or extraordinary expenses such as litigation expenses) do not exceed the limits (as a percentage of average daily net assets) set forth below:

	Class A	Class C	Class I
Mast Managed Futures Strategy Fund	1.55%	2.30%	1.30%
Mast Multialternative Strategy Fund	1.10%	N/A	0.85%

This agreement is effective through February 28, 2027, with respect to each Fund and it may only be terminated or amended prior to the end of the term with the approval of the Trust's Board of Trustees.

Any reduction in advisory fees or payment of a Fund's expenses made by the Advisor in a fiscal year may be reimbursed by the Fund for a period ending three years after the date of reduction or payment if the Advisor so requests. This reimbursement may be requested from a Fund if the reimbursement will not cause the Fund's annual expense ratio to exceed the lesser of (a) the expense limitation in effect at the time such fees were waived or payments made, or (b) the expense limitation in effect at the time of the reimbursement. However, the reimbursement amount may not exceed the total amount of fees waived and/or Fund expenses paid by the Advisor and will not include any amounts previously reimbursed to the Advisor by the Fund. Any such reimbursement is contingent upon the Board's subsequent review of the reimbursed amounts. A Fund must pay current ordinary operating expenses before the Advisor is entitled to any reimbursement of fees and/or Fund expenses.

DISTRIBUTION AND SERVICE FEES

Distribution and Service (Rule 12b-1) Fees

The Trust has adopted a plan on behalf of the Funds pursuant to Rule 12b-1 of the 1940 Act (the “12b-1 Plan”) which allows each Fund to pay distribution fees for the sale and distribution of its Class A shares and Class C shares and/or shareholder liaison service fees in connection with the provision of personal services to shareholders of Class A shares and Class C shares and the maintenance of their shareholder accounts. The 12b-1 Plan provides for the payment of such fees at the annual rate of up to 0.25% of average daily net assets attributable to Class A shares and up to 1.00% of average daily net assets attributable to Class C shares. Since these fees are paid out of each Fund’s assets attributable to the Fund’s Class A shares and Class C shares, these fees will increase the cost of your investment and, over time, may cost you more than paying other types of sales charges. The net income attributable to Class A shares and Class C shares will be reduced by the amount of distribution and shareholder liaison service fees and other expenses of a Fund associated with that class of shares.

To assist investors in comparing classes of shares, the table under the Prospectus heading “Fees and Expenses of the Fund” provides a summary of expenses and an example of the expenses of each Fund applicable to each class of shares offered in this Prospectus.

Additional Payments to Broker-Dealers and Other Financial Intermediaries

Intermediaries such as banks, broker-dealers, financial advisors or other financial institutions, some of which may be affiliates, may receive additional payments from the Fund for sub-administration, sub-transfer agency and other shareholder services associated with shareholders whose shares are held of record in omnibus accounts, other group accounts or accounts traded through registered securities clearing agents. The Fund may pay all or part of the fees paid to intermediaries. The Fund does not pay these service fees on shares purchased directly. In addition, the Advisor may, at its own expense, pay financial representatives for these services.

The Advisor, out of its own resources, and without additional cost to the Funds or their shareholders, may provide additional cash payments or non-cash compensation to broker-dealers or intermediaries that sell shares of the Funds. These additional cash payments are generally made to intermediaries that provide shareholder servicing, marketing support and/or access to sales meetings, sales representatives and management representatives of the intermediary. The Advisor may pay cash compensation for inclusion of the Funds on a sales list, including a preferred or select sales list, or in other sales programs, or may pay an expense reimbursement in cases where the intermediary provides shareholder services to the Funds’ shareholders. The Advisor may also pay cash compensation in the form of finder’s fees that vary depending on the dollar amount of the shares sold.

YOUR ACCOUNT WITH THE FUNDS

Share Price

The offering price of each class of each Fund’s shares is the net asset value per share (“NAV”) of that class. For each Fund the difference between the classes’ NAVs reflects the daily expense accruals of the distribution fees applicable to Class N Shares. Each Fund’s NAVs are calculated as of 4:00 p.m. Eastern time, the normal close of regular trading on the NYSE, on each day the NYSE is open for trading. If for example, the NYSE closes at 1:00 p.m. Eastern time, each Fund’s NAVs would still be determined as of 4:00 p.m. Eastern time. In this example, portfolio securities traded on the NYSE would be valued at their closing prices unless the Advisor determines that a “fair value” adjustment is appropriate due to subsequent events. The NAV for each class of a Fund is determined by dividing the value of the Fund’s portfolio securities, cash and other assets (including accrued interest) allocable to such class, less all liabilities (including accrued expenses) allocable to such class, by the total number of outstanding shares of such class. Each Fund’s NAVs may be calculated earlier if permitted by the SEC. The NYSE is closed on weekends and most U.S. national holidays. However, foreign securities listed primarily on non-U.S. markets may trade on weekends or other days on which a Fund does not value its shares, which may significantly affect the Fund’s NAVs on days when you are not able to buy or sell Fund shares.

The Funds' securities generally are valued at market price. Securities are valued at fair value when market quotations are not readily available. The Board has designated the Advisor as each Fund's valuation designee (the "Valuation Designee") to make all fair value determinations with respect to the Fund's portfolio investments, subject to the Board's oversight. As the Valuation Designee, the Advisor adopted and implemented policies and procedures to be followed when a Fund must utilize fair value pricing, including when reliable market quotations are not readily available, when the Fund's pricing service does not provide a valuation (or provides a valuation that, in the judgment of the Advisor, does not represent the security's fair value), or when, in the judgment of the Advisor, events have rendered the market value unreliable (see, for example, the discussion of fair value pricing of foreign securities in the paragraph below). Valuing securities at fair value involves reliance on the judgment of the Advisor, and may result in a different price being used in the calculation of the Funds' NAVs from quoted or published prices for the same securities. Fair value determinations are made by the Advisor, in good faith, in accordance with procedures approved by the Board. There can be no assurance that a Fund will obtain the fair value assigned to a security if it sells the security.

In certain circumstances, the Advisor employs fair value pricing to ensure greater accuracy in determining the Funds' daily NAVs and to prevent dilution by frequent traders or market timers who seek to exploit temporary market anomalies. Fair value pricing may be applied to foreign securities held by a Fund upon the occurrence of an event after the close of trading on non-U.S. markets but before the close of trading on the NYSE when the Funds' NAVs are determined. If the event may result in a material adjustment to the price of a Fund's foreign securities once non-U.S. markets open on the following business day (such as, for example, a significant surge or decline in the U.S. market), the Advisor may value such foreign securities at fair value, taking into account the effect of such event, in order to calculate the Funds' NAVs.

Other types of portfolio securities that the Advisor may fair value include, but are not limited to: (1) investments that are illiquid or traded infrequently, including "restricted" securities and private placements for which there is no public market; (2) investments for which, in the judgment of the Advisor, the market price is stale; (3) securities of an issuer that has entered into a restructuring; (4) securities for which trading has been halted or suspended; and (5) fixed income securities for which there are no current market value quotations.

Pricing services generally value debt securities assuming orderly transactions of an institutional round lot size, but such securities may be held or transactions may be conducted in such securities in smaller, odd lot sizes. Odd lots often trade at lower prices than institutional round lots.

Purchase of Shares

This Prospectus described the classes of shares offered by each Fund: Class A Shares, Class C Shares (*Mast Managed Futures Strategy Fund only*) and Class I shares.

- Class A and Class C shares generally incur annual distribution fees.
- Class I shares do not incur distribution fees.

By offering multiple classes of shares, the Funds permit each investor to choose the class of shares that is most beneficial given the type of investor, the amount to be invested and the length of time the investor expects to hold the shares.

Before you invest, you should compare the features of each share class, so that you can choose the class that is right for you. When selecting a share class, you should consider the following:

- which shares classes are available to you;
- how long you expect to own your shares;

- how much you intend to invest; and
- total costs and expenses associated with a particular share class.

Each class of shares generally has the same rights, except for the distribution fees, and related expenses associated with each class of shares, and the exclusive voting rights by each class with respect to any distribution plan or service plan for such class of shares.

To purchase shares of a Fund, you must invest at least the minimum amount indicated in the following table.

Minimum Investments	To Open Your Account	To Add to Your Account by Check	To Add to Your Account by Exchange	To Add to Your Account by Wire
Class A Shares and Class C Shares				
Direct Regular Accounts	\$100	\$100	\$250	\$500
Direct Retirement Accounts	\$100	\$100	\$250	\$500
Automatic Investment Plan	\$100	\$100	\$250	\$500
Gift Account For Minors	\$100	\$100	\$250	\$500
Class I Shares				
Direct Regular Accounts	\$100,000	\$100,000	\$100,000	\$1,000,000
Direct Retirement Accounts	\$100,000	\$100,000	\$100,000	\$1,000,000
Automatic Investment Plan	\$100,000	\$100,000	\$100,000	\$1,000,000
Gift Account For Minors	\$100,000	\$100,000	\$100,000	\$1,000,000

Shares of the Funds may be purchased by check, by wire transfer of funds via a bank or through an approved financial intermediary (*i.e.*, a financial supermarket, investment advisor, financial planner or consultant, broker, dealer or other investment professional and their designees) authorized by the Fund to receive purchase orders. Financial intermediaries may provide varying arrangements for their clients to purchase and redeem shares, which may include different sales charges as described in this Prospectus, additional fees and different investment minimums. In addition, from time to time, a financial intermediary may modify or waive the initial and subsequent investment minimums. Your financial intermediary may receive different compensation for selling Class A and Class C shares due to different sales charges among the share classes. Please see “Class A Shares – Sales Charge Schedule,” “Class C Shares – Class C Shares Purchase Programs” and “Waivers and Discounts Available from Intermediaries.” The share classes your financial intermediary sells may depend on, among other things, the type of investor account and the policies, procedures and practices adopted by your financial intermediary. You should review these arrangements with your financial intermediary.

You may make an initial investment in an amount greater than the minimum amounts shown in the preceding table and the Funds may, from time to time, reduce or waive the minimum initial investment amounts.

To the extent allowed by applicable law, the Funds reserve the right to discontinue offering shares at any time or to cease operating entirely.

Class A Shares

Class A shares of the Fund are sold at the public offering price, which is the NAV plus an initial maximum sales charge which varies with the amount you invest as shown in the following chart. This means that part of your investment in the Fund will be used to pay the sales charge.

Class A Shares — Sales Charge Schedule			
Your Investment	Front-End Sales Charge As a % Of Offering Price*	Front-End Sales Charge As a % Of Net Investment	Dealer Reallowance As a % Of Offering Price
Up to \$49,999	5.25%	5.54%	4.75%
\$50,000-\$99,999	4.50%	4.71%	4.00%
\$100,000-\$249,999	3.50%	3.63%	3.25%
\$250,000-\$499,999	2.50%	2.56%	2.25%
\$500,000-\$999,999	2.00%	2.04%	1.75%
\$1 million or more	See below**	See below**	See below**

* The offering price includes the sales charge.

** There is no initial sales charge on purchases of Class A shares in an account or accounts with an accumulated value of \$1 million or more, but a contingent deferred sales charge (“CDSC”) of 1.00% will be imposed in the event of certain redemptions within 12 months of the date of purchase. See the “Large Order Net Asset Value Purchase Privilege” section below. The distributor may pay a financial representative a fee as follows: up to 1% on purchases of \$1 million up to and including \$3 million, up to 0.50% on the next \$47 million, and up to 0.25% on purchase amounts over \$50 million.

Because of rounding in the calculation of front-end sales charges, the actual front-end sales charge paid by an investor may be higher or lower than the percentages noted above. No sales charge is imposed on Class A shares received from reinvestment of dividends or capital gain distributions.

Class A Shares Purchase Programs

Eligible purchasers of Class A shares also may be entitled to reduced sales charges through the **Quantity Discount** programs offered by the Funds as discussed below. Eligible purchasers of Class A shares also may be entitled to waived sales charges as discussed below under “**Net Asset Value Purchases**” and “**Large Order Net Asset Value Purchase Privilege**”. The availability of certain sales charge waivers and discounts will depend on whether you purchase your shares directly from the Funds or through a financial intermediary. As described in “**Waivers and Discounts Available from Intermediaries and Conversion Policies**,” (“**Appendix A**”) financial intermediaries may have different policies and procedures regarding the availability of front-end sales load waivers or CDSC waivers. In all instances, it is the purchaser’s responsibility to notify the Funds or the purchaser’s financial intermediary at the time of purchase of any relationship or other facts qualifying the purchaser for sales charge waivers or discounts. For waivers and discounts not available through a particular intermediary, shareholders will have to purchase Fund shares directly from the Funds or through another intermediary to receive these waivers or discounts. Please see **Appendix A** of the Prospectus for a description of waivers or discounts available through certain intermediaries.

Quantity Discounts

When purchasing Class A shares, if the dollar amount of your purchase reaches a specified level, known as a *breakpoint*, you are entitled to pay a discounted initial sales charge. For example, a purchase of up to \$49,999 of Class A shares of the Fund would pay an initial charge of 5.25%, while a purchase of \$50,000 would pay an initial charge of 4.50%. There are several breakpoints for the Fund, as shown in the “**Class A Shares — Sales Charge Schedule**”

tables above. The greater the investment, the greater the sales charge discount. Investments above \$1,000,000 have no front-end sales charge but may be subject to a CDSC (please see ***“Large Order Net Asset Value Purchase Privilege”*** below for more information).

You may be able to lower your Class A sales charges if:

- you assure the Fund in writing that you intend to invest at least \$50,000 in Class A shares of the Fund over the next 13 months in exchange for a reduced sales charge (“Letter of Intent”) (see below); or
- the amount of Class A shares you already own in the Fund plus the amount you intend to invest in Class A shares is at least \$50,000 (“Cumulative Discount”).

By signing a Letter of Intent you can purchase shares of the Funds at a lower sales charge level. Your individual purchases will be made at the applicable sales charge based on the amount you intend to invest over a 13-month period as stated in the Letter of Intent. Any shares purchased within 90 days prior to the date you sign the Letter of Intent may be used as credit toward completion of the stated amount, but the reduced sales charge will only apply to new purchases made on or after the date of the Letter of Intent. Purchases resulting from the reinvestment of dividends and capital gains do not apply toward fulfillment of the Letter of Intent. Shares equal to 5.25% of the amount stated in the Letter of Intent will be held in escrow during the 13-month period. If, at the end of the period, the total net amount invested is less than the amount stated in the Letter of Intent, you will be required to pay the difference between the reduced sales charge and the sales charge applicable to the individual net amounts invested had the Letter of Intent not been in effect. This amount will be obtained from redemption of the escrowed shares. Any remaining escrowed shares after payment to the Fund of the difference in applicable sales charges will be released to you. If you establish a Letter of Intent with the Fund, you can aggregate your accounts as well as the accounts of your immediate family members. You will need to provide written instructions with respect to the other accounts whose purchases should be considered in fulfillment of the Letter of Intent.

You may qualify for a reduced initial sales charge on purchases of Class A Shares under rights of accumulation (“ROA”). For ROA, you may take into account accumulated holdings in all Class A Shares and Class C Shares of the Fund and any other fund managed by the Advisor that were purchased previously for accounts (a) (i) in your name, (ii) in the name of your spouse, (iii) in the name of you and your spouse, or (iv) in the name of your minor child under the age of 21, and (b) sharing the same mailing address (“Accounts”). Subject to your financial institution’s capabilities, your accumulated holdings will be calculated as the higher of (a) the current value of your existing holdings (as of the day prior to your additional Fund investment) or (b) the amount you invested (including reinvested dividends and capital gains, but excluding capital appreciation) less any withdrawals. The transaction processing procedures maintained by certain financial institutions through which you can purchase Fund shares may restrict the universe of Accounts considered for purposes of calculating a reduced sales charge under ROA. For example, the processing procedures of a financial institution may limit Accounts to those that share the same tax identification number or mailing address and that are maintained only with that financial institution. The Fund permits financial institutions to calculate ROA based on the financial institution’s transaction processing procedures. Please contact your financial institution before investing to determine the process used to identify Accounts for ROA purposes. The Fund may amend or terminate this right of accumulation at any time.

The Letter of Intent, Cumulative Discount and ROA are intended to let you combine investments made at other times for purposes of calculating your present sales charge. Any time you can use any of these quantity discounts to “move” your investment into a lower sales charge level, it is generally beneficial for you to do so.

For purposes of determining whether you are eligible for a reduced Class A sales charge, you and your immediate family members (*i.e.*, your spouse or domestic partner and your children or stepchildren age 21 or younger) may aggregate your investments in the Fund. This includes, for example, investments held in a retirement account, an employee benefit plan, or through a financial advisor other than the one handling your current purchase. These combined investments will be valued at their current offering price to determine whether your current investment amount qualifies for a reduced sales charge.

You must notify the Funds or an approved financial intermediary at the time of purchase whenever a quantity discount is applicable to purchases and you may be required to provide the Funds, or an approved financial intermediary, with certain information or records to verify your eligibility for a quantity discount. Such information or records may include account statements or other records regarding the shares of the Fund held in all accounts (*e.g.*, retirement accounts) by you and other eligible persons, which may include accounts held at the Fund or at other approved financial intermediaries. Upon such notification, you will pay the sales charge at the lowest applicable sales charge level. You should retain any records necessary to substantiate the purchase price of the Fund's shares, as the Fund and approved financial intermediaries may not retain this information.

Information about sales charges can be obtained by calling the Fund at 1-833-829-0010 or you can consult with your financial representative.

Net Asset Value Purchases.

Class A shares are available for purchase without a sales charge if you are:

- reinvesting dividends or distributions;
- making additional investments for your 401(k) or other retirement or direct accounts;
- participating in an investment advisory or agency commission program under which you pay a fee to an investment advisor or other firm for portfolio management or brokerage services;
- a financial intermediary purchasing on behalf of its clients that: (i) is compensated by clients on a fee-only basis, including but not limited to investment advisors, financial planners, and bank trust departments; or (ii) has entered into an agreement with the Funds to offer Class A shares through a no-load network or platform (please see **Appendix A** for a list of financial intermediaries that have these arrangements);
- a current Trustee of the Trust; or
- an employee (including the employee's spouse, domestic partner, children, grandchildren, parents, grandparents, siblings and any dependent of the employee, as defined in Section 152 of the Internal Revenue Code of 1986, as amended) of the Advisor or of a broker-dealer authorized to sell shares of the Fund.

Your financial advisor or the Funds' transfer agent (the "Transfer Agent") can answer your questions and help you determine if you are eligible.

Large Order Net Asset Value Purchase Privilege. There is no initial sales charge on purchases of Class A shares in an account or accounts with an accumulated value of \$1 million or more, but a contingent deferred sales charge ("CDSC") of 1.00% will be imposed in the event of certain redemptions within 12 months of the date of purchase. The CDSC is assessed on an amount equal to the lesser of the then current market value of the shares or the historical cost of the shares (which is the amount actually paid for the shares at the time of purchase) being redeemed.

From its own profits and resources, the Advisor may pay a finder's fee to authorized dealers that initiate or are responsible for purchases of \$1 million or more of Class A shares of the Fund, in accordance with the following fee schedule: 1.00% on purchases of \$1 million up to and including \$3 million, 0.50% on the next \$47 million and 0.25% on purchase amounts over \$50 million. If an authorized dealer agrees to waive its receipt of the finder's fee described above, the CDSC on Class A shares generally will be waived.

A CDSC will be waived in the following circumstances:

- if you are a current Trustee of the Trust; or
- if you are an employee (including the employee's spouse, domestic partner, children, grandchildren, parents, grandparents, siblings and any dependent of the employee, as defined in Section 152 of the Internal Revenue Code of 1986, as amended) of the Advisor and its affiliates or of a broker-dealer authorized to sell shares of the Funds.

Your financial advisor or the Transfer Agent can answer your questions and help you determine if you are eligible.

Class C Shares

Under the 12b-1 Plan, a distribution fee at an annual rate of 1.00% of average daily net assets is deducted from the assets of the Fund's Class C Shares.

Class C Shares of the Fund are sold at NAV and are subject to a CDSC of 1.00% on any shares you sell within 12 months of purchasing them.

The CDSC is assessed on an amount equal to the lesser of the then current market value of the shares or the historical cost of the shares (which is the amount actually paid for the shares at the time of purchase) being redeemed. Accordingly, no CDSC is imposed on increases in the NAV above the initial purchase price. You should retain any records necessary to substantiate the historical cost of your shares, as the Fund and authorized dealers may not retain this information. In addition, no CDSC is assessed on shares received from reinvestment of dividends or capital gain distributions. The Fund will not accept a purchase order for Class C Shares in the amount of \$1 million or more.

In determining whether a CDSC applies to a redemption, the Fund assumes that the shares being redeemed first are any shares in your account that are not subject to a CDSC, followed by shares held the longest in your account.

Information on sales charges can also be obtained by calling the Fund at 1-833-829-0010, or consulting with your financial advisor.

Class C Shares Purchase Programs

The availability of certain sales charge waivers and discounts will depend on whether you purchase your shares directly from the Funds or through a financial intermediary. As described under **Appendix A** financial intermediaries may have different policies and procedures regarding the availability of CDSC waivers. In all instances, it is the purchaser's responsibility to notify the Funds or the purchaser's financial intermediary at the time of purchase of any relationship or other facts qualifying the purchaser for sales charge waivers or discounts. For waivers and discounts not available through a particular intermediary, shareholders will have to purchase Fund shares directly from the Funds or through another intermediary to receive these waivers or discounts. Please see **Appendix A** for a description of waivers or discounts available through certain intermediaries.

As described below, eligible purchasers of Class C shares may be entitled to the elimination of CDSC. You may be required to provide the Fund, or its authorized dealer, with certain information or records to verify your eligibility.

A CDSC will not be applied in the following cases:

- upon the conversion of Class A shares into another Class of shares of the Fund;
- the death or disability of an account owner (including a joint owner). This waiver applies only under certain conditions. Your financial representative or the Fund's transfer agent must be contacted to determine if the conditions exist;

- withdrawals made through an automatic withdrawal plan. Such withdrawals may be made up to a maximum of 12% of the net asset value of the account on the date of the withdrawal;
- withdrawals related to certain retirement or benefit plans; or
- redemptions for certain loan advances, hardship provisions or returns of excess contributions from retirement plans.

Your financial advisor or the Fund's transfer agent can answer questions and help determine if you are eligible.

You may qualify for a reduced initial sales charge on purchases of Class C Shares under ROA. The Class C Shares of other mutual funds managed by the Advisor may be included when considering eligibility for reduced sales charges under ROA. The transaction processing procedures maintained by certain financial institutions through which you can purchase Fund shares may restrict the universe of accounts considered for purposes of calculating a reduced sales charge under ROA. For example, the processing procedures of a financial institution may limit accounts to those that share the same tax identification number or mailing address and that are maintained only with that financial institution. The Fund permits financial institutions to calculate ROA based on the financial institution's transaction processing procedures.

For ROA, you may take into account accumulated holdings in all Class C Shares of the Fund and any other fund managed by the Advisor that were purchased previously for accounts (a) (i) in your name, (ii) in the name of your spouse, (iii) in the name of you and your spouse, or (iv) in the name of your minor child under the age of 21, and (b) sharing the same mailing address ("Accounts"). Subject to your financial institution's capabilities, your accumulated holdings will be calculated as the higher of (a) the current value of your existing holdings (as of the day prior to your additional Fund investment) or (b) the amount you invested (including reinvested dividends and capital gains, but excluding capital appreciation) less any withdrawals. Please contact your financial institution before investing to determine the process used to identify accounts for ROA purposes. The Fund may amend or terminate this right of accumulation at any time.

Information on sales charges can also be obtained by calling the Fund at 1-833-829-0010, or consulting with your financial advisor.

Class I Shares

To purchase Class I Shares of the Fund, you generally must invest at least \$100,000. Class I Shares are not subject to any initial sales charge. No CDSC is imposed on redemptions of Class I Shares, and you do not pay any ongoing distribution/service fees.

Class I Shares are available for purchase by clients of financial intermediaries who charge such clients an ongoing fee for advisory, investment, consulting or similar services. Such clients may include individuals, corporations, endowments and foundations.

In Kind Purchases and Redemptions

Each Fund reserves the right to accept payment for shares in the form of securities that are permissible investments for the Fund. Each Fund also reserves the right to pay redemptions by an "in-kind" distribution of portfolio securities (instead of cash) from the Fund. In-kind purchases and redemptions are generally taxable events and may result in the recognition of gain or loss for federal income tax purposes. See the SAI for further information about the terms of these purchases and redemptions.

Additional Investments

Additional subscriptions in a Fund generally may be made by investing at least the minimum amount shown in the table above. Exceptions may be made at a Fund's discretion. You may purchase additional shares of a Fund by sending a check together with the investment stub from your most recent account statement to the Fund at the applicable address listed on the table below. Please ensure that you include your account number on the check. If you do not have the investment stub from your account statement, list your name, address and account number on a separate sheet of paper and include it with your check. You may also make additional investments in a Fund by wire transfer of funds or through an approved financial intermediary. The minimum additional investment amount is automatically waived for shares purchased by Trustees of the Trust and current or retired directors and employees of the Advisor and its affiliates. Please follow the procedures described in this Prospectus.

Dividend Reinvestment

You may reinvest dividends and capital gains distributions in shares of the Funds. Such shares are acquired at NAV (without a sales charge) on the applicable payable date of the dividend or capital gain distribution. Unless you instruct otherwise, dividends and distributions on Fund shares are automatically reinvested in shares of the same class of the Fund paying the dividend or distribution. This instruction may be made by writing to the Transfer Agent or by telephone by calling 1-833-829-0010. You may, on the account application form or prior to any declaration, instruct that dividends and/or capital gain distributions be paid in cash or be reinvested in the Fund at the next determined NAV. If you elect to receive dividends and/or capital gain distributions in cash and the U.S. Postal Service cannot deliver the check, or if a check remains outstanding for six months or more, the Fund reserves the right to reinvest the distribution check in your account at the Fund's current NAV and to reinvest all subsequent distributions.

Customer Identification Information

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify and record information that identifies each person who opens an account. When you open an account, you will be asked for your name, date of birth (for a natural person), your residential address or principal place of business, and mailing address, if different, as well as your Social Security Number or Taxpayer Identification Number. Additional information is required for corporations, partnerships and other entities, including the name, residential address, date of birth and Social Security Number of the underlying beneficial owners and authorized control persons of entity owners. Applications without such information will not be considered in good order. Each Fund reserves the right to deny any application if the application is not in good order.

This Prospectus should not be considered a solicitation to purchase or as an offer to sell shares of the Funds in any jurisdiction where it would be unlawful to do so under the laws of that jurisdiction. Please note that the value of your account may be transferred to the appropriate state if no activity occurs in the account within the time period specified by state law.

Automatic Investment Plan

If you intend to use the Automatic Investment Plan ("AIP"), you may open your account with the initial minimum investment amount. Once an account has been opened, you may make additional investments in a Fund at regular intervals through the AIP. If elected on your account application, funds can be automatically transferred from your checking or savings account on the 5th, 10th, 15th, 20th or 25th of each month. In order to participate in the AIP, each additional subscription must be at least \$50, and your financial institution must be a member of the ACH network. The first AIP purchase will be made 15 days after the Funds' transfer agent (the "Transfer Agent") receives your request in good order. The Transfer Agent will charge a \$25 fee for any ACH payment that is rejected by your bank. Your AIP will be terminated if two successive mailings we send to you are returned by the U.S. Postal Service as undeliverable. You may terminate your participation in the AIP at any time by notifying the Transfer Agent at 1-833-829-0010 at least five days prior to the date of the next AIP transfer. A Fund may modify or terminate the AIP at any time without notice.

Timing and Nature of Requests

The purchase price you will pay for a Fund's shares will be the next NAV calculated after the Transfer Agent or your authorized financial intermediary receives your request in good order. "Good order" means that your purchase request includes: (1) the name of the Fund, (2) the dollar amount of shares to be purchased, (3) your purchase application or investment stub, and (4) a check payable to **Mast Funds**. All requests received in good order before 4:00 p.m. (Eastern Time) on any business day will be processed on that same day. Requests received at or after 4:00 p.m. (Eastern Time) will be transacted at the next business day's NAV. All purchases must be made in U.S. dollars and drawn on U.S. financial institutions.

Methods of Buying

***Through a
broker-dealer or
other financial
intermediary***

Each Fund is offered through certain approved financial intermediaries (and their designees). Each Fund is also offered directly. A purchase order placed with a financial intermediary or its authorized designee is treated as if such order were placed directly with the Fund, and will be deemed to have been received by the Fund when the financial intermediary or its authorized designee receives the order and executed at the next NAV calculated by the Fund. Your financial intermediary will hold your shares in a pooled account in its (or its designee's) name. A Fund may pay your financial intermediary (or its designee) to maintain your individual ownership information, maintain required records, and provide other shareholder services. A financial intermediary which offers shares may charge its individual clients transaction fees which may be in addition to those described in this Prospectus. For example, the financial intermediary may charge transaction fees or set different minimum investments. Your financial intermediary is responsible for processing your order correctly and promptly, keeping you advised of the status of your account, confirming your transactions and ensuring that you receive copies of the Fund's Prospectus. Please contact your financial intermediary to determine whether it is an approved financial intermediary of the Funds or for additional information. The Fund has authorized one or more brokers to receive purchase orders on its behalf.

By mail

A Fund will not accept payment in cash, including cashier's checks. Also, to prevent check fraud, a Fund will not accept third party checks, Treasury checks, credit card checks, traveler's checks, money orders or starter checks for the purchase of shares. All checks must be made in U.S. dollars and drawn on U.S. financial institutions.

To buy shares directly from a Fund by mail, complete an account application and send it together with your check for the amount you wish to invest to the Fund at the address indicated below. To make additional investments once you have opened your account, write your account number on the check and send it to the Fund together with the most recent confirmation statement received from the Transfer Agent. If your check is returned for insufficient funds, your purchase will be canceled and a \$25 fee will be assessed against your account by the Transfer Agent.

Regular Mail

Mast Funds

P.O. Box 2175
Milwaukee, Wisconsin 53201

Overnight Delivery

Mast Funds

235 West Galena Street
Milwaukee, Wisconsin 53212

The Funds do not consider the U.S. Postal Service or other independent delivery services to be its agents.

<i>By telephone</i>	To make additional investments by telephone, you must authorize telephone purchases on your account application. If you have given authorization for telephone transactions and your account has been open for at least 15 days, call the Transfer Agent toll-free at 1-833-829-0010 and you will be allowed to move money in amounts of at least \$100 for Class A and Class C shares but not greater than \$50,000, from your bank account to the applicable Fund's account upon request. Only bank accounts held at U.S. institutions that are ACH members may be used for telephone transactions. If your order is placed before 4:00 p.m. (Eastern Time) on a business day shares will be purchased in your account at the NAV calculated on that day. Orders received at or after 4:00 p.m. (Eastern Time) will be transacted at the next business day's NAV. For security reasons, requests by telephone will be recorded.
<i>By wire</i>	To open an account by wire, a completed account application form must be received by a Fund before your wire can be accepted. You may mail or send by overnight delivery your account application form to the Transfer Agent. Upon receipt of your completed account application form, an account will be established for you. The account number assigned to you will be required as part of the wiring instruction that should be provided to your bank to send the wire. Your bank must include the name of the Fund, the account number, and your name so that monies can be correctly applied. Your bank should transmit monies by wire to: UMB Bank, n.a. ABA Number 101000695 For credit to Mast Funds A/C # 9872748042 For further credit to: Your account number Fund Name Name(s) of investor(s) Social Security Number or Taxpayer Identification Number Before sending your wire, please contact the Transfer Agent at 1-833-829-0010 to notify it of your intention to wire funds. This will ensure prompt and accurate credit upon receipt of your wire. Your bank may charge a fee for its wiring service. Wired funds must be received prior to 4:00 p.m. (Eastern Time) on a business day to be eligible for same day pricing. The Funds and UMB Bank, n.a. are not responsible for the consequences of delays resulting from the banking or Federal Reserve wire system, or from incomplete wiring instructions.

Selling (Redeeming) Fund Shares

<i>Through a broker-dealer or other financial intermediary</i>	If you purchased your shares through an approved financial intermediary, your redemption order must be placed through the same financial intermediary. Such financial intermediaries are authorized to designate other financial intermediaries to receive purchase and redemption orders on the Fund's behalf. A Fund will be deemed to have received a redemption order when a financial intermediary (or its authorized designee) receives the order. The financial intermediary (or its authorized designee) must receive your redemption order prior to 4:00 p.m. (Eastern Time) on a business day for the redemption to be processed at the current day's NAV. Orders received at or after 4:00 p.m. (Eastern Time) on a business day or on a day when the Fund does not value its shares will be transacted at the next business day's NAV. Please keep in mind that your financial intermediary (or its authorized designee) may charge additional fees for its services. In the event your approved financial intermediary is no longer available or in operation, you may place your redemption order directly with the Fund as described below. The Fund has authorized one or more brokers to receive redemption orders on its behalf.
---	---

By mail

You may redeem shares purchased directly from a Fund by mail. Send your written redemption request to **Mast Funds** at the address indicated below. Your request must be in good order and contain the Fund name, the name(s) on the account, your account number and the dollar amount or the number of shares to be redeemed. The redemption request must be signed by all shareholders listed on the account. Additional documents are required for certain types of shareholders, such as corporations, partnerships, executors, trustees, administrators, or guardians (*i.e.*, corporate resolutions dated within 60 days, or trust documents indicating proper authorization).

Regular Mail***Mast Funds***

Overnight Delivery***Mast Funds***

235 West Galena Street

Milwaukee, Wisconsin 53212

A Medallion signature guarantee must be included if any of the following situations apply:

- You wish to redeem more than \$50,000 worth of shares;
- When redemption proceeds are sent to any person, address or bank account not on record;
- If a change of address was received by the Transfer Agent within the last 15 days;
- If ownership is changed on your account; or
- When establishing or modifying certain services on your account.

By telephone

To redeem shares by telephone, call the Funds at 1-833-829-0010 and specify the amount of money you wish to redeem. You may have a check sent to the address of record, or, if previously established on your account, you may have proceeds sent by wire or electronic funds transfer through the ACH network directly to your bank account. Wire transfers are subject to a \$20 fee paid by the shareholder and your bank may charge a fee to receive wired funds. Checks sent via overnight delivery are subject to a \$25 charge. You do not incur any charge when proceeds are sent via the ACH network; however, credit may not be available for two to three business days.

If you are authorized to perform telephone transactions (either through your account application form or by subsequent arrangement in writing with the Funds), you may redeem shares worth up to \$50,000, by instructing the Funds by phone at 1-833-829-0010. Unless noted on the initial account application, a Medallion signature guarantee is required of all shareholders in order to qualify for or to change telephone redemption privileges.

Note: The Funds and all of their service providers will not be liable for any loss or expense in acting upon instructions that are reasonably believed to be genuine. To confirm that all telephone instructions are genuine, the caller must verify the following:

- The Fund account number;
 - The name in which his or her account is registered;
 - The Social Security Number or Taxpayer Identification Number under which the account is registered; and
 - The address of the account holder, as stated in the account application form.
-

Medallion Signature Guarantee

In addition to the situations described above, each Fund reserves the right to require a Medallion signature guarantee in other instances based on the circumstances relative to the particular situation.

Shareholders redeeming more than \$50,000 worth of shares by mail should submit written instructions with a Medallion signature guarantee from an eligible institution acceptable to the Transfer Agent, such as a domestic bank or trust company, broker, dealer, clearing agency or savings association, or from any participant in a Medallion program recognized by the Securities Transfer Association. The three currently recognized Medallion programs are Securities Transfer Agents Medallion Program, Stock Exchanges Medallion Program and New York Stock Exchange, Inc. Medallion Signature Program. Signature guarantees that are not part of these programs will not be accepted. Participants in Medallion programs are subject to dollar limitations which must be considered when requesting their guarantee. The Transfer Agent may reject any signature guarantee if it believes the transaction would otherwise be improper. *A notary public cannot provide a signature guarantee.*

Systematic Withdrawal Plan

You may request that a predetermined dollar amount be sent to you on a monthly, quarterly, semi-annual or annual withdrawal basis. Your account must maintain the following values for you to be eligible to participate in the Systematic Withdrawal Plan ("SWP"):

For Class A and Class C shareholders:

Regular account: \$2,000

IRAs: \$250

Transfers/Gifts to Minors: \$250

For Class I shareholders:

The minimum account balance requirement is \$100,000.

The minimum withdrawal amount is \$250. If you elect to receive redemptions through the SWP, the Funds will send a check to your address of record, or will send the payment via electronic funds transfer through the ACH network, directly to your bank account on record. You may request an application for the SWP by calling the Transfer Agent toll-free at 1-833-829-0010. A Fund may modify or terminate the SWP at any time. You may terminate your participation in the SWP by calling the Transfer Agent at least five business days before the next withdrawal.

Payment of Redemption Proceeds

You may redeem shares of a Fund at a price equal to the NAV next determined after the Transfer Agent and/or authorized designee receives your redemption request in good order. Generally, your redemption request cannot be processed on days the NYSE is closed. Redemption proceeds for requests received in good order by the Transfer Agent and/or authorized designee before the close of the regular trading session of the NYSE (generally, 4:00 p.m. Eastern Time) will usually be sent to the address of record or the bank you indicate, or wired using the wire instructions on record on the following business day. Payment of redemption proceeds may take longer than typically expected, but will be sent within seven calendar days after the Fund receives your redemption request, except as specified below.

If you purchase shares using a check and request a redemption before the check has cleared, a Fund may postpone payment of your redemption proceeds up to 15 calendar days while the Fund waits for the check to clear. Furthermore, a Fund may suspend the right to redeem shares or postpone the date of payment upon redemption for more than seven calendar days: (1) for any period during which the NYSE is closed (other than customary weekend or holiday closings) or trading on the NYSE is restricted; (2) for any period during which an emergency exists affecting the sale of the Fund's securities or making such sale or the fair determination of the value of the Fund's net assets not reasonably practicable; or (3) for such other periods as the SEC may permit for the protection of the Fund's shareholders.

Low Balances

If at any time your account balance falls below \$2,000 (\$250 for retirement and gifts to minors accounts) for Class A and Class C shares, and \$100,000 for Class I shares, a Fund may notify you that, unless the account is brought up to at least \$2,000 (\$250 for retirement and gifts to minors accounts) for Class A and Class C shares, and \$100,000 for Class I shares, within 60 days of the notice, your account could be closed. After the notice period, a Fund may redeem all of your shares and close your account by sending you a check to the address of record. Your account will not be closed if the account balance drops below the minimum account balance requirement due to a decline in NAV.

Other Redemption Information

IRA and retirement plan redemptions from accounts for which UMB Bank, n.a. is the custodian must be completed on an IRA Distribution Form or other acceptable form approved by UMB Bank, n.a. Shareholders who hold shares of a Fund through an IRA or other retirement plan must indicate on their redemption requests whether to withhold federal income tax. Such redemption requests will generally be subject to a 10% federal income tax withholding unless a shareholder elects not to have taxes withheld. An IRA owner with a foreign residential address may not elect to forgo the 10% withholding. In addition, if you are a resident of certain states, state income tax also applies to non-Roth IRA distributions when federal withholding applies. Please consult with your tax professional.

The Funds generally pay sale (redemption) proceeds in cash. The Funds typically expect to satisfy redemption requests by selling portfolio assets or by using holdings of cash or cash equivalents. On a less regular basis, a Fund may utilize a temporary overdraft facility offered through its custodian, UMB Bank, n.a., in order to assist the Fund in meeting redemption requests. The Funds use these methods during both normal and stressed market conditions. During conditions that make the payment of cash unwise and/or in order to protect the interests of a Fund's remaining shareholders, the Fund may pay all or part of a shareholder's redemption proceeds in portfolio securities with a market value equal to the redemption price (redemption-in-kind) in lieu of cash. The Funds may redeem shares in-kind during both normal and stressed market conditions. Generally, in-kind redemptions will be effected through a pro rata distribution of the Fund's portfolio securities. If a Fund redeems your shares in-kind, you will bear any market risks associated with investment in those securities, and you will be responsible for the costs (including brokerage charges) of converting the securities to cash. On a less regular basis, the Funds may also satisfy redemption requests by using other short-term borrowings from their custodian.

Cost Basis Information

Federal tax law requires that regulated investment companies, such as the Funds, report their shareholders' cost basis, gain/loss, and holding period to the IRS on the shareholders' Consolidated Form 1099s when "covered" shares of the regulated investment companies are sold. Covered shares are any shares acquired (including pursuant to a dividend reinvestment plan) on or after January 1, 2012.

Each Fund has chosen "first-in, first-out" ("FIFO") as its standing (default) tax lot identification method for all shareholders, which means this is the method the Fund will use to determine which specific shares are deemed to be sold when there are multiple purchases on different dates at differing net asset values and the entire position is not sold at one time. A Fund's standing tax lot identification method is the method it will use to report the sale of covered shares on your Consolidated Form 1099 if you do not select a specific tax lot identification method. Redemptions are taxable and you may realize a gain or loss upon the sale of your shares. Certain shareholders may be subject to backup withholding.

Subject to certain limitations, you may choose a method other than a Fund's standing method at the time of your purchase or upon the sale of covered shares. Please refer to the appropriate Treasury regulations or consult your tax advisor with regard to your personal circumstances.

Tools to Combat Frequent Transactions

The Trust's Board of Trustees has adopted policies and procedures with respect to frequent purchases and redemptions of Fund shares by Fund shareholders. The Trust discourages excessive, short-term trading and other abusive trading practices that may disrupt portfolio management strategies and harm a Fund's performance. The Trust takes steps to reduce the frequency and effect of these activities on the Funds. These steps may include monitoring trading activity and using fair value pricing. In addition, the Trust may take action, which may include using its best efforts to restrict a shareholder from making additional purchases in a Fund, if that shareholder has engaged in four or more "round trips" in the Fund during a 12-month period. Although these efforts (which are described in more detail below) are designed to discourage abusive trading practices, these tools cannot eliminate the possibility that such activity may occur. Further, while the Trust makes efforts to identify and restrict frequent trading, the Trust receives purchase and sale orders through financial intermediaries and cannot always know or detect frequent trading that may be facilitated by the use of intermediaries or the use of group or omnibus accounts by those intermediaries. The Trust seeks to exercise its judgment in implementing these tools to the best of its ability in a manner that the Trust believes is consistent with the interests of Fund shareholders.

Monitoring Trading Practices

The Trust may monitor trades in Fund shares in an effort to detect short-term trading activities. If, as a result of this monitoring, the Trust believes that a shareholder of a Fund has engaged in excessive short-term trading, it may, in its discretion, ask the shareholder to stop such activities or refuse to process purchases in the shareholder's accounts. In making such judgments, the Trust seeks to act in a manner that it believes is consistent with the best interest of Fund shareholders. Due to the complexity and subjectivity involved in identifying abusive trading activity, there can be no assurance that the Trust's efforts will identify all trades or trading practices that may be considered abusive.

General Transaction Policies

Some of the following policies are mentioned above. In general, the Fund reserves the right to:

- vary or waive any minimum investment requirement;
- refuse, change, discontinue, or temporarily suspend account services, including purchase or telephone redemption privileges (if redemption by telephone is not available, you may send your redemption order to the Funds via regular or overnight delivery), for any reason;
- reject any purchase request for any reason (generally a Fund does this if the purchase is disruptive to the efficient management of the Fund due to the timing of the investment or an investor's history of excessive trading);
- delay paying redemption proceeds for up to seven calendar days after receiving a request, if an earlier payment could adversely affect the Funds;
- reject any purchase or redemption request that does not contain all required documentation; and
- subject to applicable law and with prior notice, adopt other policies from time to time requiring mandatory redemption of shares in certain circumstances.

If you elect telephone privileges on the account application or in a letter to the Funds, you may be responsible for any fraudulent telephone orders as long as the Funds and/or their service providers have taken reasonable precautions to verify your identity. In addition, once you place a telephone transaction request, it cannot be canceled or modified.

During periods of significant economic or market change, telephone transactions may be difficult to complete. If you are unable to contact the Funds by telephone, you may also mail your request to the Funds at the address listed under "Methods of Buying."

Your broker or other financial intermediary may establish policies that differ from those of the Funds. For example, the organization may charge transaction fees, set higher minimum investments, or impose certain limitations on buying or selling shares in addition to those identified in this Prospectus. Contact your broker or other financial intermediary for details.

Please note that the value of your account may be transferred to the appropriate state if no activity occurs in the account within the time period specified by state law.

Exchange Privilege

You may exchange Class A, Class C and Class I shares, as applicable, of a Fund for the same class of shares of other funds managed by the Advisor. The amount of the exchange must be equal to or greater than the required minimum initial investment of the other fund, as stated in that fund's prospectus. You may realize either a gain or loss on those shares and will be responsible for paying any applicable taxes. If you exchange shares through a broker, the broker may charge you a transaction fee. You may exchange shares by sending a written request to the Fund or by telephone. Be sure that your written request includes the dollar amount or number of shares to be exchanged, the name(s) on the account and the account number(s), and is signed by all shareholders on the account. In order to limit expenses, the Fund reserves the right to limit the total number of exchanges you can make in any year. There are no sales charges for exchanges of Class A, Class C and Class I shares.

Conversion of Shares

A share conversion is a transaction in which shares of one class of the Fund are exchanged for shares of another class of the Fund. Share conversions can occur between Class A, Class C and Class I shares of the Fund. Generally, share conversions occur when a shareholder becomes eligible for another share class of the Fund or no longer meets the eligibility criteria of the share class owned by the shareholder (and another class exists for which the shareholder would be eligible). Please note that a share conversion is generally a non-taxable event, but you should consult with your personal tax advisor on your particular circumstances. Please also note, all share conversion requests must be approved by the Advisor.

A request for a share conversion will not be processed until it is received in "good order" (as defined above) by the Fund or your financial intermediary. To receive the NAV of the new class calculated that day, conversion requests must be received in good order by the Fund or your financial intermediary before 4:00 p.m., Eastern Time or the financial intermediary's earlier applicable deadline. Please note that, because the NAV of each class of the Fund will generally vary from the NAVs of the other classes due to differences in expenses, you will receive a number of shares of the new class that is different from the number of shares that you held of the old class, but the total value of your holdings will remain the same.

The Fund's frequent trading policies will not be applicable to share conversions. If you hold your shares through a financial intermediary, please contact the financial intermediary for more information on share conversions. Please note that certain financial intermediaries may not permit all types of share conversions. The Fund reserves the right to terminate, suspend or modify the share conversion privilege for any shareholder or group of shareholders.

The Fund reserves the right to automatically convert shareholders from one class to another if they either no longer qualify as eligible for their existing class or if they become eligible for another class. Such mandatory conversions may be as a result of a change in value of an account due to market movements, exchanges or redemptions. The Fund will notify affected shareholders in writing prior to any mandatory conversion.

Automatic Conversion of Class C Shares

If you are holding Class C shares directly with a Fund, upon the eight year anniversary of the purchase of your Class C shares, your Class C shares will automatically convert to Class A shares of the same Fund. For all Class C shares of a Fund held through a financial intermediary, your Class C Shares will be subject to the Class C conversion policy of the financial intermediary and it is the financial intermediary's responsibility, and not the Fund's, to keep records and

to ensure that the shareholder is credited with the proper holding period. Not all financial intermediaries are able to track the aging of share lot purchases in order to credit individual shareholders' holding periods. In particular, group retirement plans held through third party intermediaries that hold Class C shares in an omnibus account, in certain instances, do not track participant level share lot aging. Please consult with your financial intermediary about your eligibility to exercise this conversion privilege.

Shareholders will not pay a sales charge, including a CDSC, upon the automatic conversion of their Class C shares to Class A shares. The automatic conversion of the Fund's Class C shares into Class A shares after the eight year holding period is not expected to be a taxable event for federal income tax purposes. Shareholders should consult with their tax advisor regarding the state and local tax consequences of such conversions.

For more information, please see **Appendix A** for additional information regarding financial intermediaries' policies with respect to automatic conversion of Class C Shares.

Reinstatement Privilege

If you have redeemed Class A or Class C shares, the Reinstatement Privilege permits shareholders to reinvest the proceeds in Class A or Class C shares, respectively, of the Fund or of another Mast Investments Fund within 30 days from the date of redemption without an initial sales charge or a deferred sales charge, as appropriate. Your financial representative must notify the transfer agent or the distributor prior to your purchase in order to exercise the Reinstatement Privilege. In addition, a CDSC paid to the distributor may be credited with the amount of the Class A or Class C CDSC, as appropriate, in shares of the Mast Investments Fund at the current NAV if a shareholder reinstates their fund account holdings within 30 days from the date of redemption.

If you redeemed Class C shares of a Mast Investments Fund in the past 30 days and paid a deferred sales charge, you may buy Class C shares of the Fund or of another Mast Investments Fund at the current NAV and be credited with the amount of the deferred sales charges in shares of the Mast Investments Fund, if the distributor or the transfer agent is notified.

Availability of Information

Information regarding sales charges of the Fund and the applicability and availability of discounts from sales charges is available by calling the Funds at 1-833-829-0010. The Prospectus and SAI are also available on the Funds' website <https://www.mast-funds.com/>.

Prospectus and Shareholder Report Mailings

In order to reduce the amount of mail you receive and to help reduce expenses, we generally send a single copy of any shareholder report and Prospectus to each household. If you do not want the mailing of these documents to be combined with those of other members of your household, please contact your authorized dealer or the Transfer Agent.

Additional Information

The Funds enter into contractual arrangements with various parties, including among others the Advisor, who provide services to the Funds. Shareholders are not parties to, or intended (or "third party") beneficiaries of, those contractual arrangements.

The Prospectus and the SAI provide information concerning the Funds that you should consider in determining whether to purchase shares of the Funds. The Funds may make changes to this information from time to time. Neither this Prospectus nor the SAI is intended to give rise to any contract rights or other rights in any shareholder, other than any rights conferred by federal or state securities laws that may not be waived.

DIVIDENDS AND DISTRIBUTIONS

The Funds will make distributions of net investment income quarterly and net capital gains, if any, at least annually, typically in December. The Funds may make additional payments of dividends or distributions if it deems it desirable at any other time during the year.

All dividends and distributions will be reinvested in Fund shares unless you choose one of the following options: (1) to receive net investment income dividends in cash, while reinvesting capital gain distributions in additional Fund shares; or (2) to receive all dividends and distributions in cash. If you wish to change your distribution option, please write to the Transfer Agent before the payment date of the distribution.

If you elect to receive distributions in cash and the U.S. Postal Service cannot deliver your check, or if your distribution check has not been cashed for six months, each Fund reserves the right to reinvest the distribution check in your account at the Fund's then current NAV and to reinvest all subsequent distributions.

FEDERAL INCOME TAX CONSEQUENCES

The following discussion is very general and does not address investors subject to special rules, such as investors who hold Fund shares through an IRA, 401(k) plan or other tax-advantaged account. The SAI contains further information about taxes. Because each shareholder's circumstances are different and special tax rules may apply, you should consult your tax advisor about your investment in a Fund.

You will generally have to pay federal income taxes, as well as any state or local taxes, on distributions received from a Fund, whether paid in cash or reinvested in additional shares. If you sell Fund shares, it is generally considered a taxable event. If you exchange shares of a Fund for shares of another fund, the exchange will generally be treated as a sale of the Fund's shares and any gain on the transaction may be subject to federal income tax.

Distributions of net investment income, other than distributions a Fund reports as "qualified dividend income," are taxable for federal income tax purposes at ordinary income tax rates. Distributions of net short-term capital gains are also generally taxable at ordinary income tax rates. Distributions from a Fund's net capital gain (*i.e.*, the excess of its net long-term capital gain over its net short-term capital loss) are taxable for federal income tax purposes as long-term capital gain, regardless of how long the shareholder has held Fund shares.

Dividends paid by a Fund (but none of a Fund's capital gain distributions) may qualify in part for the dividends received deduction available to corporate shareholders, provided certain holding period and other requirements are satisfied. Dividends received by a Fund from REITs generally are not expected to qualify for treatment as qualified dividend income or for the dividends-received deduction. Distributions that a Fund reports as "qualified dividend income" may be eligible to be taxed to non-corporate shareholders at the reduced rates applicable to long-term capital gain if derived from a Fund's qualified dividend income and/or if certain other requirements are satisfied. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that a Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market.

You may want to avoid buying shares of a Fund just before it declares a distribution (on or before the record date), because such a distribution will be taxable to you even though it may effectively be a return of a portion of your investment.

Although distributions are generally taxable when received, dividends declared in October, November or December to shareholders of record as of a date in such month and paid during the following January are treated as if received on December 31 of the calendar year when the dividends were declared.

Information on the federal income tax status of dividends and distributions is provided annually.

Dividends and distributions from a Fund and net gain from redemptions of Fund shares will generally be taken into account in determining a shareholder's "net investment income" for purposes of the 3.8% Medicare contribution tax applicable to certain individuals, estates and trusts.

If you do not provide a Fund with your correct taxpayer identification number and any required certifications, you will be subject to backup withholding on your redemption proceeds, dividends and other distributions. The backup withholding rate is currently 24%.

Dividends and certain other payments made by a Fund to a non-U.S. shareholder are subject to withholding of federal income tax at the rate of 30% (or such lower rate as may be determined in accordance with any applicable treaty). Dividends that are reported by a Fund as "interest-related dividends" or "short-term capital gain dividends" are generally exempt from such withholding. In general, a Fund may report interest-related dividends to the extent of its net income derived from U.S.-source interest and a Fund may report short-term capital gain dividends to the extent its net short-term capital gain for the taxable year exceeds its net long-term capital loss. Backup withholding will not be applied to payments that have been subject to the 30% withholding tax described in this paragraph.

Under legislation commonly referred to as "FATCA," unless certain non-U.S. entities that hold shares comply with requirements that will generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to dividends payable to such entities. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the United States and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of the agreement.

Some of a Fund's investment income may be subject to foreign income taxes that are withheld at the country of origin. Tax treaties between certain countries and the United States may reduce or eliminate such taxes, but there can be no assurance that a Fund will qualify for treaty benefits.

FINANCIAL HIGHLIGHTS

The Fund's Financial Highlights for the fiscal year ended October 31, 2025, are incorporated in this Prospectus by reference to the Fund's Annual Financials and Other Information, which are included as part of the Fund's most recent Form N-CSR filing, which can be located on the SEC's website and is available upon request (see back cover).

APPENDIX A – WAIVERS AND DISCOUNTS AVAILABLE FROM INTERMEDIARIES AND CONVERSION POLICIES

The availability of certain sales charge waivers and discounts will depend on whether you purchase your shares directly from the Funds or through a financial intermediary. Intermediaries may have different policies and procedures regarding the availability of front-end sales load waivers or contingent deferred sales load (“CDSC”) waivers than those discussed below, which have been provided by the respective intermediaries. In all instances, it is the purchaser’s responsibility to notify the Fund or the purchaser’s financial intermediary at the time of purchase of any relationship or other facts qualifying the purchaser for sales charge waivers or discounts. **For waivers and discounts not available through a particular intermediary, shareholders will have to purchase Fund shares directly from the Fund or through another intermediary to receive these waivers or discounts.** Please contact the applicable intermediary with any questions regarding how the intermediary applies the policies described below and to ensure that you understand what steps you must take to qualify for any available waivers or discounts.

AMERIPRISE FINANCIAL

Class A Shares Front-End Sales Charge Waivers Available at Ameriprise Financial:

The following information applies to Class A shares purchases if you have an account with or otherwise purchase Fund shares through Ameriprise Financial:

Effective on or after February 1, 2021, Shareholders purchasing Fund shares through an Ameriprise Financial brokerage account are eligible for the following front-end sales charge waivers, which may differ from those disclosed elsewhere in this Fund’s prospectus or SAI:

- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs.
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same Fund (but not any other fund within the same fund family).
- Shares exchanged from Class C shares of the same fund in the month of or following the 7-year anniversary of the purchase date. To the extent that this prospectus elsewhere provides for a waiver with respect to exchanges of Class C shares or conversion of Class C shares following a shorter holding period, that waiver will apply.
- Employees and registered representatives of Ameriprise Financial or its affiliates and their immediate family members.
- Shares purchased by or through qualified accounts (including IRAs, Coverdell Education Savings Accounts, 401(k)s, 403(b) TSCAs subject to ERISA and defined benefit plans) that are held by a covered family member, defined as an Ameriprise financial advisor and/or the advisor’s spouse, advisor’s lineal ascendant (mother, father, grandmother, grandfather, great grandmother, great grandfather), advisor’s lineal descendant (son, step-son, daughter, step-daughter, grandson, granddaughter, great grandson, great granddaughter) or any spouse of a covered family member who is a lineal descendant.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (i.e. Rights of Reinstatement).

EDWARD D. JONES & CO., L.P. (“EDWARD JONES”)

Policies Regarding Transactions Through Edward Jones

Effective on or after January 1, 2024, the following information supersedes prior information with respect to transactions and positions held in fund shares through an Edward Jones system. Clients of Edward Jones (also referred to as “shareholders”) purchasing fund shares on the Edward Jones commission and fee-based platforms are eligible only for the following sales charge discounts (also referred to as “breakpoints”) and waivers, which can differ from discounts and waivers described elsewhere in the mutual fund Prospectus or SAI or through another broker-dealer. In all instances, it is the shareholder’s responsibility to inform Edward Jones at the time of purchase of any relationship, holdings of other

funds in the mutual fund family, or other facts qualifying the purchaser for discounts or waivers. Edward Jones can ask for documentation of such circumstance. Shareholders should contact Edward Jones if they have questions regarding their eligibility for these discounts and waivers.

Breakpoints

Breakpoint pricing, otherwise known as volume pricing, at dollar thresholds as described in this Prospectus.

Rights of Accumulation (“ROA”)

- The applicable sales charge on a purchase of Class A shares is determined by taking into account all share classes (except certain money market funds and any assets held in group retirement plans) of the mutual fund family held by the shareholder or in an account grouped by Edward Jones with other accounts for the purpose of providing certain pricing considerations (“pricing groups”). If grouping assets as a shareholder, this includes all share classes held on the Edward Jones platform and/or held on another platform. The inclusion of eligible fund family assets in the ROA calculation is dependent on the shareholder notifying Edward Jones of such assets at the time of calculation. Money market funds are included only if such shares were sold with a sales charge at the time of purchase or acquired in exchange for shares purchased with a sales charge.
- The employer maintaining a SEP IRA plan and/or SIMPLE IRA plan may elect to establish or change ROA for the IRA accounts associated with the plan to a plan-level grouping as opposed to including all share classes at a shareholder or pricing group level.
- ROA is determined by calculating the higher of cost minus redemptions or market value (current shares x NAV).

Letter of Intent (“LOI”)

- Through a LOI, shareholders can receive the sales charge and breakpoint discounts for purchases shareholders intend to make over a 13-month period from the date Edward Jones receives the LOI. The LOI is determined by calculating the higher of cost or market value of qualifying holdings at LOI initiation in combination with the value that the shareholder intends to buy over a 13-month period to calculate the front-end sales charge and any breakpoint discounts. Each purchase the shareholder makes during that 13-month period will receive the sales charge and breakpoint discount that applies to the total amount. The inclusion of eligible fund family assets in the LOI calculation is dependent on the shareholder notifying Edward Jones of such assets at the time of calculation. Purchases made before the LOI is received by Edward Jones are not adjusted under the LOI and will not reduce the sales charge previously paid. Sales charges will be adjusted if LOI is not met.
- If the employer maintaining a SEP IRA plan and/or SIMPLE IRA plan has elected to establish or change ROA for the IRA accounts associated with the plan to a plan-level grouping, LOIs will also be at the plan-level and may only be established by the employer.

Sales Charge Waivers

Sales charges are waived for the following shareholders and in the following situations:

- Associates of Edward Jones and its affiliates and other accounts in the same pricing group (as determined by Edward Jones under its policies and procedures) as the associate. This waiver will continue for the remainder of the associate’s life if the associate retires from Edward Jones in good-standing and remains in good standing pursuant to Edward Jones’ policies and procedures.
- Shares purchased in an Edward Jones fee-based program.
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment. Shares purchased from the proceeds of redeemed shares of the same fund family so long as the following conditions are met: the proceeds are from the sale of shares within 60 days of the purchase, the sale and purchase are made from a share class that charges a front load and one of the following:
 - The redemption and repurchase occur in the same account.
 - The redemption proceeds are used to process an: IRA contribution, excess contributions, conversion, recharacterizing of contributions, or distribution, and the repurchase is done in an account within the same Edward Jones grouping for ROA.

- Shares exchanged into Class A shares from another share class so long as the exchange is into the same fund and was initiated at the discretion of Edward Jones. Edward Jones is responsible for any remaining CDSC due to the fund company, if applicable. Any future purchases are subject to the applicable sales charge as disclosed in the Prospectus.
- Exchanges from Class C shares to Class A shares of the same fund, generally, in the 84th month following the anniversary of the purchase date or earlier at the discretion of Edward Jones.
- Purchases of Class 529-A shares through a rollover from either another education savings plan or a security used for qualified distributions.
- Purchases of Class 529 shares made for recontribution of refunded amounts.

Continent Deferred Sales Charge (“CDSC”) Waivers

If the shareholder purchases shares that are subject to a CDSC and those shares are redeemed before the CDSC is expired, the shareholder is responsible to pay the CDSC except in the following conditions:

- The death or disability of the shareholder.
- Systematic withdrawals with up to 10% per year of the account value.
- Return of excess contributions from an Individual Retirement Account (IRA).
- Shares redeemed as part of a required minimum distribution for IRA and retirement accounts if the redemption is taken in or after the year the shareholder reaches qualified age based on applicable IRS regulations.
- Shares redeemed to pay Edward Jones fees or costs in such cases where the transaction is initiated by Edward Jones.
- Shares exchanged in an Edward Jones fee-based program.
- Shares acquired through NAV reinstatement.
- Shares redeemed at the discretion of Edward Jones for Minimums Balances, as described below.

JANNEY MONTGOMERY SCOTT (“JANNEY”)

Effective May 1, 2020, shareholders purchasing fund shares through a Janney account will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this Prospectus or the SAI.

Front-End Sales Charge Waivers on Class A Shares Available at Janney

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family).
- Shares purchased by employees and registered representatives of Janney or its affiliates and their family members as designated by Janney.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within ninety (90) days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (i.e., right of reinstatement).
- Class C shares that are no longer subject to a contingent deferred sales charge and are converted to Class A shares of the same fund pursuant to Janney’s policies and procedures.

Sales Charge Waivers on Class A and Class C Shares Available at Janney

- Shares sold upon the death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in this Prospectus.
- Shares purchased in connection with a return of excess contributions from an IRA account.
- Shares sold as part of a required minimum distribution for IRA and other retirement accounts due to the shareholder reaching age 70½ as described in this Prospectus.
- Shares sold to pay Janney fees but only if the transaction is initiated by Janney.
- Shares acquired through a right of reinstatement.

Front-End Load Discounts Available at Janney: Breakpoints, and/or Rights of Accumulation

- Breakpoints as described in this Prospectus.
- Rights of accumulation (“ROA”), which entitle shareholders to breakpoint discounts, will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser’s household at Janney. Eligible fund family assets not held at Janney may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets.

MERRILL LYNCH

Shareholders purchasing fund shares through a Merrill Lynch platform or account will be eligible only for the following sales charge waivers (front-end sales charge waivers and CDSC waivers) and discounts, which may differ from those disclosed elsewhere in this Prospectus or the SAI. The availability of certain sales charge waivers and discounts will depend on whether you purchase your shares directly from the Fund or through a financial intermediary. Intermediaries may have different policies and procedures regarding the availability of front-end sales load waivers or contingent deferred (back-end) sales load (“CDSC”) waivers, which are discussed below. In all instances, it is the purchaser’s responsibility to notify the Fund or the purchaser’s financial intermediary at the time of purchase of any relationship or other facts qualifying the purchaser for sales charge waivers or discounts. A Merrill Lynch representative may ask for reasonable documentation of such facts and Merrill Lynch may condition the granting of a waiver or discount on the timely receipt of such documentation. For waivers and discounts not available through a particular intermediary, shareholders will have to purchase Fund shares directly from the Fund or through another intermediary to receive these waivers or discounts.

Front-End Load Waivers Available at Merrill Lynch

- Shares of mutual funds available for purchase by employer-sponsored retirement, deferred compensation, and employee benefit plans (including health savings accounts) and trusts used to fund those plans provided the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans.
- Shares purchased through a Merrill Lynch investment advisory program.
- Brokerage class shares exchanged from advisory class shares due to the holdings moving from a Merrill investment advisory program to a Merrill brokerage account.
- Shares purchased through the Merrill Edge Self-Directed platform.
- Shares purchased through the systematic reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same mutual fund in the same account.
- Shares exchanged from level-load shares to front-end load shares of the same mutual fund in accordance with the description in the Merrill Sales Load Waiver and Discounts Supplement (the “Merrill SLWD Supplement”) and in the Mutual Fund Investing at Merrill Lynch pamphlet at ml.com/funds.
- Shares purchased by eligible employees of Merrill Lynch or its affiliates and their family members who purchase shares in accounts within the employee’s Merrill Lynch Household (as defined in the Merrill SLWD Supplement).
- Shares purchased by eligible persons associated with the fund as defined in this prospectus (e.g. the fund’s officers or trustees).
- Shares purchased from the proceeds of a mutual fund redemption in front-end load shares provided (1) the repurchase is in a mutual fund within the same fund family; (2) the repurchase occurs within 90 calendar days from the redemption trade date, and (3) the redemption and purchase occur in the same account (known as Rights of Reinstatement). Automated transactions (i.e. systematic purchases and withdrawals) and purchases made after shares are automatically sold to pay Merrill’s account maintenance fees are not eligible for Rights of Reinstatement.

CDSC Waivers on Front-End, Back-End, and Level Load Shares Available at Merrill Lynch

- Shares sold due to the client's death or disability (as defined by Internal Revenue Code Section 221(3)).
- Shares sold pursuant to a systematic withdrawal program subject to Merrill's maximum systematic withdrawal limits as described in the Merrill SLWD Supplement.
- Shares sold due to return of excess contributions from an IRA account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the investor reaching the qualified age based on applicable IRS regulation Front-end or level-load shares held in commission-based, non-taxable retirement brokerage accounts (e.g. traditional, Roth, rollover, SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans) that are transferred to fee-based accounts or platforms and exchanged for a lower cost share class of the same mutual fund
- Front-end or level-load shares held in commission-based, non-taxable retirement brokerage accounts (e.g. traditional, Roth, rollover, SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans) that are transferred to fee-based accounts or platforms and exchanged for a lower cost share class of the same mutual fund

Front-End Load Discounts Available at Merrill Lynch: Breakpoints, Rights of Accumulation and Letters of Intent

- Breakpoint discounts, as described in this prospectus, where the sales load is at or below the maximum sales load that Merrill permits to be assessed to a front-end load purchase, as described in the Merrill SLWD Supplement.
- Rights of Accumulation (ROA), as described in the Merrill SLWD Supplement, which entitle clients to breakpoint discounts based on the aggregated holdings of mutual fund family assets held in accounts in their Merrill Household.
- Letters of Intent (LOI), which allow for breakpoint discounts on eligible new purchases based on anticipated future eligible purchases within a fund family at Merrill, in accounts within your Merrill Household, as further described in the Merrill SLWD Supplement.

MORGAN STANLEY WEALTH MANAGEMENT ("MORGAN STANLEY")

Effective July 1, 2018, shareholders purchasing Fund shares through a Morgan Stanley transactional brokerage account will be eligible only for the following front-end sales charge waivers with respect to Class A shares, which may differ from and may be more limited than those disclosed elsewhere in this Fund's Prospectus or SAI.

Front-End Sales Charge Waivers on Class A Shares Available at Morgan Stanley

- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans.
- Morgan Stanley employee and employee-related accounts according to Morgan Stanley's account linking rules.
- Shares purchased through reinvestment of dividends and capital gains distributions when purchasing shares of the same fund.
- Shares purchased through a Morgan Stanley self-directed brokerage account.
- Class C (i.e., level-load) shares that are no longer subject to a contingent deferred sales charge and are converted to Class A shares of the same fund pursuant to Morgan Stanley Wealth Management's share class conversion program.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (i) the repurchase occurs within 90 days following the redemption, (ii) the redemption and purchase occur in the same account, and (iii) redeemed shares were subject to a front-end or deferred sales charge.

RAYMOND JAMES & ASSOCIATES, INC., RAYMOND JAMES FINANCIAL SERVICES, INC. AND EACH ENTITY'S AFFILIATES ("RAYMOND JAMES")

Effective March 1, 2019, shareholders purchasing fund shares through a Raymond James platform or account, through an introducing broker-dealer or independent registered investment adviser for which Raymond James provides trade execution, clearance, and/or custody services, will be eligible only for the following loan waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this fund's prospectus or SAI.

Front-End Sales Load Waivers on Class A Shares Available at Raymond James

- Shares purchased in an investment advisory program.
- Shares purchased within the same fund family through a systematic reinvestment of capital gains and dividend distributions.
- Employees and registered representatives of Raymond James or its affiliates and their family members as designated by Raymond James.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement).
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of Raymond James.

CDSC Waivers on Class A Shares and Class C Shares Available at Raymond James

- Death or disability of the shareholder.
- Shares sold as part a systematic withdrawal plan as described in this Prospectus.
- Return of excess contributions from an IRA Account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations as described in this Prospectus.
- Shares sold to pay Raymond James fees but only if the transaction is initiated by Raymond James.
- Shares acquired through a right of reinstatement.

Front-End Load Discounts Available at Raymond James: Breakpoints, Rights of Accumulation and/or Letters of Intent

- Breakpoints as described in this Prospectus.
- Rights of accumulation which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Raymond James. Eligible fund family assets not held at Raymond James may be included in the calculation of rights of accumulation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of intent which allow for breakpoint discounts based on anticipated purchases within a fund family, over a 13-month time period. Eligible fund family assets not held at Raymond James may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets.

Statement of Additional Information (SAI)

The SAI provides additional details about the investments and techniques of the Funds and certain other additional information. The current SAI is on file with the SEC and is incorporated into this Prospectus by reference. This means that the SAI is legally considered a part of this Prospectus even though it is not physically within this Prospectus.

Shareholder Reports and Financials and Other Information

Additional information about each Fund's investments is available in the Fund's annual and semi-annual reports to shareholders and each Fund's Financials and Other Information, which are each included in the Fund's Form N-CSR filings. In each Fund's annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its most recent fiscal year. In each Fund's Financial Statements and Other Information, you will find the Fund's annual and semi-annual financial statements.

The Funds' SAI is available and the Funds' annual and semi-annual reports, and Financial Statements and Other Information are available, free of charge, on the Funds' website at <https://www.mast-funds.com/>. You can also obtain a free copy of the Funds' SAI or the Funds' annual and semi-annual reports, request other information, or inquire about a Fund by contacting a broker that sells shares of the Funds or by calling the Funds (toll-free) at 1-833-829-0010 or by writing to:
